B+B Unternehmensberatung	B+B is certified ISV and SI for MPE/iX. Since becoming MPE/iX Porting center for EMEA in 1999, B+B is focused on Migrating and Porting Applications to Open Platforms. Our 4-step migration concept (especially for Cobol Applications), allows companies with applications developed in-house to quickly and easily migrate to platform independence, and then to HP-UX (Linux or others). Through migration analysis and evaluation of suitable tools available on the market we figure out the best solution to meet your particular needs. We will support you during the whole migration process and work closely with you to deliver an individually personalized solution. In 2001 B+B received the HP award. Lemit Inc.	Lemit Inc is a North American Migration company offering solutions for legacy applications to Windows platform. With the state of the art migration center at Bangalore and associate marketing office at Europe and with Channel partners, Lemit Inc offers total migration of all legacy systems. Lemit Inc has its proprietary suite of tools, named as LeMiT that parses all legacy sources into a relational database. With enhanced program mining, LeMiT builds the application prototype, generates a relational database schema, and translates the legacy sources to Java / Visual Basic application. LeMiT's framework based migration ensures full source tracking, connectivity to Mail system, full integration with Office products and support to all popular databases. All programs are analyzed based on the information flow and each such block of code is graphically viewed and actions initiated. Lemit Inc provides end to end Fixed Price solutions for source migration from e3000. Lemit executes migration project from its India center with onsite project support with a sound transition time line, including 90 days warranty support. Lemit's migration model leverages your current investment and supports Windows N-Tier architecture. The Software Revolution Inc.	The Software Revolution, Inc. (TSRI) provides services for the automated transformation of HP e3000 applications to functionally equivalent, platform independent, C++, C#, VB, Java or J2EE programming languages. Employing state-of-the-art artificial intelligence-based technologies, TSRI offers a highly automated, low risk, cost effective service for modernizing HP e3000 legacy system software. TSRI will migrate valuable and often irreplaceable HP e3000 software to a more modern, platform independent, target language and computing environment. TSRI addresses each step of the legacy system modernization process with an extremely high level of automation. Specifically: 1.) Assessment of the "As-Is" and "To-Be" app's. 2.) Transformation to the "To-Be" target language. 3.) Re-Factoring (optimizing) the new application. 4.) Web Enablement to either J2EE or .NET.	The Software Revolution, Inc. (TSRI) focuses on all areas of industry where legacy software and/or databases require upgrade or modernization to a more maintainable, object-oriented language or database schedule. Our timely, cost effective, firm fixed-price services have been proven repeatedly, and are well documented, with the following entities: 1.) Federal Government / Military 2.) Federal Government / Government IT 3.) State Government 4.) Transoft Inc.	Transoft has more than 12 years of experience of migrating some 150 users' IBM mainframe, DEC VAX, Data General MV, Prime, NCR VRX, Bull GCOS, as well as HP 3000 and other proprietary systems to UNIX and NT Open Systems platforms. Our application transformation and integration technologies in addition to our services enable you to not only safely move your legacy application but to also improve and add functionality to it during the process. For example, we can take your green screen application into a Java or VB GUI client/server environment. We can take your data to a modern relational database, such as Oracle or SQL Server. And we can move your COBOL developers into a highly productive Rapid Application Development Environment, with your choice of open systems COBOL. Double byte translation also provided.	Across all industries, but a significant number of customers are in Retail Distribution and Healthcare.
