

HP ProCurve Product Naming

As of October 1st, 2008, Colubris Networks has been acquired by HP ProCurve. HP ProCurve has begun integrating the Colubris product line into its ProCurve Networking product portfolio (www.procurve.com/news/colubris-10-01-08.htm).

Colubris product names are being changed to their equivalent HP ProCurve product names. In this 5.2.4 release, the management tool user interface and online help use the new HP ProCurve product names. However, the documentation continues to use the Colubris product names.

Note: SOAP and SNMP MIBs retain the Colubris naming so you do not need to change your existing SOAP and MIB usage.

The Colubris Networks product names and their corresponding new HP ProCurve product names are as follows:
