» Officejet Pro 8500A Premium e-AiO[5]

For more information about printing using AirPrint - go to www.hp.com/go/airprint

1. Requires an internet connection to the printer. Feature works with any internet and email capable device. Print times may vary. For a list of supported devices, see www.hp.com/go/ePrintCenter.
2. AP region only - the HP Photosmart Ink Advantage e-All-in-One does not support AirPrint
3. Supports iOS 4.2 devices (iPad, iPhone 4, iPhone 3GS, iPod touch 3rd,4th generation). Works with HP ePrint-enabled printers and all-in-ones. The Apple device and the HP ePrint product must be available on the same 802.11 wireless network. Wireless performance is dependent upon physical environment and distance from access point.
4. HP recommends always updating to the latest firmware version for the best printer performance.
5. HP Photosmart and Officejet e-All-in-one products - Firmware updates are enabled from the printer's front control panel when "Enable Web Services" is turned on. To verify if your product has the latest firmware installed, check for 'Product Update' in the product's control panel. HP LaserJet e-All-in-Ones – firmware updates need to be downloaded from HP's support website (see URLs above) to a Mac or PC and installed on the printer using the downloaded utility.
6. Product availability may vary by country
