

Software updates and licensing portal provides access to software product and documentation updates as well as order physical media, if available, to customers with a contractual support agreement. As software products have an updates, the latest versions of the software and documentations are made available. A license key or access code, or instructions for obtaining a license key or access code, will also be provided when required to download, install, or run the latest software version.

An HP Passport login account and one or more active support agreements with software updates linked to your HP Support Center user account is required to access software updates.
