

November, 2011

Dear valued customer,

HP vPars v6.0 for BL8x0c i2 software (BB068AAE) is initially introduced with electronic delivery beginning November 14, 2011. In March 2012, the new vPars v6 software will be available on physical media and fully integrated into selected Operating Environment downloads.

For earliest access* to HP vPars v6.0 for BL8x0c i2 please see the chart below. New orders for the OE's below require the electronic delivery method for access to vPars v6. OE support downloads (through SW Update Service) require a support agreement for the product numbers shown.

Description	Product Number For new orders	Support Product Number For SW Update Service**
HP vPars v6 for BL8x0c i2	BB068AAE	N/A for product intro
