

Fast, easy access to corporate e-mail when you're on the go.

Access your corporate e-mail:

- **With security**
- **While on the road**
- **In real time**
- **Using lightweight equipment**
- **With the same e-mail address you use at work**
- **Internet access right out of the box**

W I R E L E S S A C C E S S

Accessing your e-mail while out-of-the-office used to be a chore. It starts with a bulky computer. Add accessories, files and folders, and you now have a bag which barely meets today's airline carry on size standards. The limited battery life of many of these devices will require you to find a location that provides both power and a phone jack—provided you remembered to bring the power adapter and modem cable. By the time the laptop finally boots up and you've figured out how to make your connection, your plane has left the gate. Sound familiar?

Wireless Access is changing the way people receive and send e-mail on the go. Using the latest in software, computing devices, wireless modems, and network technology, you can access your e-mail just like you would in your own office: in real time, with the same e-mail address, and without heavy equipment. It's ready to go out of the box if you have Internet access to your corporate e-mail. Now as a busy professional, you don't have to let your e-mail pile up while you are away from the office. With Wireless Access you can receive and respond to messages in airports, hotels, job sites—virtually anywhere.

Wireless Access supports e-mail software such as Lotus Notes®, Microsoft Exchange Server®, Novell GroupWise®, Lotus cc: Mail® and Microsoft Mail. You can also get wireless access to group calendars, to-do lists, and personal address books.

Big Results. Small Investment.

Wireless Access is a communications tool designed to make you more accessible, productive and efficient. Best of all, Wireless Access doesn't cost a bundle to use. You can get Wireless Access and the equipment you need to use it for one low monthly fee (based on a 24-month lease commitment or purchase price). For more information or to sign up, contact the authorized distributor on the back of this sheet.

This special offer includes the following:

- River Run Software Group's Mail on the Run®
- HP Jornada 620LX or HP Jornada 820LX Palmtop Personal Computer

WIRELESS ACCESS

River Run Software Group's Mail on the Run®, with over 1,100 corporate users, provides you powerful yet easy-to-use software for secure wireless access from your HP hand-held PC to your Lotus Notes®, Microsoft Exchange Server®, Novell GroupWise® and Lotus cc:Mail®. Not only do you gain access to your corporate e-mail, calendar and contacts, River Run Software Group also provides solutions to access critical database information.

Hewlett-Packard Jornada 620LX or Hewlett-Packard Jornada 820LX Palmtop Personal Computers were designed with the mobile professional in mind. These Windows CE devices from HP provide exceptional battery life, up to 10 hours, "instant on" functionality, lightweight and in the case of the 820LX, a full keyboard.

Specifications:

HP Jornada 620LX is 7.8 inches long and weighs 20.6 oz.

HP Jornada 820LX is 9.7 inches long and weighs 2.5 pounds.

The Sierra Wireless AirCard® 300 for Windows CE is a wireless modem that enables access to enterprise networks, intranets, e-mail and the Internet. Designed as a true type 2 PC Card package with an internal cellular radio, the AirCard 300 eliminates the need for any additional devices or wires. The modem also incorporates advanced power management techniques to ensure maximum battery life of the host Windows CE device or the modem itself.

The AT&T Wireless IP Network, transmits data to and from wireless devices in over 3,000 cities in the U.S. Because this network is from AT&T, it uses the latest technology to assure fast, secure, and reliable transmissions.
