

**HP OpenView  
Usage Management Solutions  
Capturing Value**

### **HP OpenView Internet Usage Manager 4.0**

With the convergence of voice and data, of wireline and wireless services, and of prepaid and post-paid billing processes comes great opportunity but also substantial risk. What about existing infrastructure and processes? How do you generate new revenues to maximize return on assets? Will new services be profitable? The new HP OpenView Internet Usage Manager 4.0 provides a convergent mediation solution for 3G services, yet integrates with existing infrastructure and business processes to minimize impact on current operations. Built-in revenue assurance and audit features minimize revenue leakage and help isolate problems. And the HP OpenView Dynamic Netvalue Analyzer provides definitive real-time, interactive profitability analysis to support marketing and pricing strategy. Find out how you can capture greater value from your services, and join the scores of top service providers worldwide who have successfully deployed these HP OpenView usage management solutions.
