# HP Workstations for Adobe® Creative Cloud™

Switch to HP Workstations for the full power of Adobe media software

The professional video tools that Adobe offers in Creative Cloud are widely accepted as the best in the industry. They enable you to push the limits of your creativity with enhancements and integration that make your workflow faster. And with the Adobe Creative Cloud, you receive exclusive access to new features, services, and every upgrade as soon as it is available, so you'll always stay on the leading edge of media creation.

- Designed to work the way editors think, Adobe Premiere Pro offers a slew of new features and refinements that let you move through your projects efficiently and intuitively
- Speed up productions by accessing Adobe Story scripts inside Adobe Prelude and Adobe Premiere Pro, matching them to clips and using Speech to Text analysis
- Work easily in 3D, thanks to Live 3D Pipeline with Cinema 4D in After Effects
- Get great-sounding results easily with audio enhancements in Adobe Premiere Pro and improved integration with 64-bit Audition
- Easily apply rich color grading looks directly in Adobe Premiere Pro, or send to SpeedGrade for precise control over every aspect of a production's color and light

## Speed seamlessly from script to screen

### Create at the speed of thought

Your production is your vision. HP Workstations help bring it to life with multi-core processors, large memory capacities, leading-edge graphics, and unique technologies built for the media and entertainment industries. Whether in a desktop or a mobile system, HP Workstations also bring you high system reliability, HP DreamColor technology to maintain consistent colors, certification from independent software vendors, and tool-less maintenance and upgrades.

### The new performance standard

Work faster and more productively, and access a wider range of hardware extensions, enhancements and upgrades from the Windows/PC ecosystem. Designed to deliver higher performance, more storage, and greater flexibility, when you move to HP Workstations, you get a cost-effective platform that enables you to offer greater value to your clients.

### Broaden your horizons

Windows 8 Pro helps you get the most from all your hardware – tablets, convertibles, notebooks, and desktops. Windows 8 Pro has a beautiful, fast, and fluid design. Use touch, mouse and keyboard together, seamlessly, to do what you want the way you want. And because it works alongside existing Windows 7 systems, apps, and peripherals it integrates easily into your environment.

### Increase production values

When you're working with video, sound, and visual effects, you need tools that work well together. That's why HP works collaboratively with Adobe and other leading industry software and hardware manufacturers to ensure our products integrate seamlessly into your production and post-production workflows. With HP and Adobe, you can focus on your art instead of your technology, and your investment in hardware and software shines through as quality on the screen.

HP recommends Windows 8 Pro.

## Maximize performance and value with Adobe Creative Cloud on HP Workstations powered by Windows 8 Pro

## HP recommends Windows 8 Pro.

With Adobe Creative Cloud running on HP Workstations, your concepts become finished projects more quickly and easily than ever before. From color correction to sound sweetening, Adobe puts all the tools you need at your fingertips. And HP Workstations, powered by Windows 8 Pro, provide all the processing power required to run them at the peak of their performance. HP and Adobe put everything you need in a single, integrated solution, so you can realize your most creative visions on one high-value platform.

### How to buy

Contact an authorized HP and Adobe reseller today for more information or to purchase an HP Workstation powered by Windows 8 Pro, to maximize performance of Adobe Creative Cloud. A list of participating resellers is available for download at [hp.com/go/HPAdobeResellers](http://hp.com/go/HPAdobeResellers)

1. Not all features are available in all editions of Windows 8. Systems may require upgraded and/or separately purchased hardware, drivers and/or software to take full advantage of Windows 8 functionality. See [microsoft.com/](http://microsoft.com/)
2. Multi-Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel® architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers, and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel® 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations.
3. Each processor supports up to 2 channels of DDR3 memory. To realize full performance at least 1 DIMM must be inserted into each channel.
4. Intel® Xeon E3 and Intel Pentium processors can support either ECC or non-ECC memory. Intel Core i3/i5/i7 processors only support non-ECC memory.
5. For hard drives, 1 GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less.
6. HP Care Pack Services extend service contracts beyond the standard warranties. Service starts from date of hardware purchase. To choose the right level of service for your HP product, use the HP Care Pack Services Lookup Tool at [hp.com/go/lookuptool](http://hp.com/go/lookuptool). Additional HP Care Pack Services information by product is available at [hp.com/go/carepack](http://hp.com/go/carepack). Service levels and response times for HP Care Packs may vary depending on your geographic location.
