

HP Output Management Documentum Integration Service

Print or archive your business-critical output with expertise from HP

HP can help ensure your business-critical documents are properly managed to meet compliance.

Your enterprise applications, such as SAP or Oracle®, touch nearly every part of your business. Given the complexity of these types of implementations, organizations that rely on them face a variety of output challenges—such as disseminating data in multiple formats, improving the reliability of document delivery, and archiving all the business-critical documents to meet compliance. The HP Output Management solution—the intelligent link that gets critical documents from virtually any application to nearly any destination reliably, efficiently, and cost-effectively—is a natural fit for your SAP or Oracle environment. To complement your enterprise applications and output management environments, HP offers an integration service for EMC Documentum. This is a robust, flexible platform that supports your enterprise output management environment by supplying common services and tools to manage content, processes, and a central repository for your business-critical documents.

Comprehensive service

As part of the HP Output Management solution, HP can help you develop an integrated output solution that can automate sending your SAP or Oracle documents to a printer or a central repository using EMC Documentum, an enterprise content management platform. Our HP professionals can help integrate Documentum to bring together people, processes, and content across your organization. The Documentum software product helps you manage all types of output across multiple departments within a single repository so various groups throughout the company can share and reuse content. Content can also be shared safely outside the company with partners, vendors, and customers.

While HP Output Management solutions are very flexible and easy to integrate with other systems, you can do it much faster and easier with help from HP Technical Consultants. Our knowledgeable consultants meet with you to discuss the integration aspects and key functions of your output management system. Documentum, along with HP Output Server, the core platform for any HP Output Management solution, extends the capabilities of your output environment even further. These extensions are designed to meet the print and archive requirements of your SAP or Oracle documents. The end result is a reliable and efficient system that safely prints, stores, and manages your business-critical information.

Get the most from your software investment

Your HP account team continually strives to support the business and information delivery goals of your organization. Upon request, we assess your document delivery environment and suggest ways to improve its functionality. The team then focuses on methods to enhance your information delivery through continual improvement of your output environment—helping to ensure alignment with your business goals and critical success factors.

Documentum provides a single platform, consisting of archiving and content management services that can be deployed incrementally in order to satisfy your evolving enterprise application requirements. To meet compliance regulations, Documentum helps ensure that company-wide content is complete, accurate, and protected from inappropriate use. Your content is always readily accessible to regulators, auditors, and employees.

Documentum is just one of many applications HP is familiar with and has successfully helped other customers use to enhance their HP Output Management solution. The HP Output Server and Documentum integration capability facilitates the delivery of documents into the Documentum content management system using Documentum API. Your documents can be delivered directly to Documentum or other output management destination types plus a copy loaded into Documentum upon successful job completion.

Contact your local HP sales representative to learn how you can integrate Documentum content management capabilities and enhance the functionality of your output management environment.

Enhance your HP Output Management solution with Documentum to reliably and efficiently print and archive your business-critical information.

At-a-glance: HP Output Management Documentum Integration Service

Who we are: HP Output Management Technical Consultants have many years of output management experience. We can work with you to design and implement an output management solution that's right for your business.

What we do: HP Output Management Documentum Integration Service can help you interweave your enterprise content management platform with HP Output Server to enhance the functionality of your output management system.

Our experience: Our consultants have an average of seven to ten years of dedicated document delivery experience.

Global presence: With highly trained experts around the world, we provide the same responsive service whether you're based in a remote location or a major market.

Partners: Our partners include Microsoft®, Oracle, and SAP.

Customers: Our customers include Allergan, Columbus McKinnon, Iron Mountain, L'Oreal, Moen Incorporated, as well as other Fortune 500 companies worldwide.

Why we're different

We're different because we understand that you're different. Our team can work with you to design an output management solution that's right for your goals—whether they involve reducing output management costs, improving content delivery, integrating your enterprise output environment with your IT infrastructure, or all of the above. Moreover, our service offerings are comprehensive and encompass an assessment of your enterprise output management and document delivery needs, as well as solution development, deployment, management, and support.

Understanding the enterprise

We've helped hundreds of corporations successfully design and implement output management solutions in unforgiving enterprise environments, where lost or late information can cost millions of dollars. We've even helped ourselves. Following HP's merger with Compaq, we successfully simplified our own output management environment to improve reliability and enable centralized control—saving the company US \$4.5 million per year in the process.¹

Global resources locally

We combine the resources of a large, global enterprise with local support and services that speak your language. With highly trained experts around the world, we provide the same responsive service whether you're based in a remote location or a major market.

Comprehensive technology expertise

By working with HP you have access to all the technology expertise required for a successful information delivery system. HP has experts that understand all the hardware components of the solution: servers that are scalable to meet your performance needs, whether UNIX® or Linux platforms; devices whether they are single function printers or the most versatile multi-function devices; and the networking and failover infrastructure required to prevent disruptions. Our experts can cover all your software and interface needs as well. Most importantly, HP brings it all together with expertise that spans the full range of technical skills and business processes required.

Our people make the difference

Our team has particular expertise in providing output management solutions for complex enterprise environments. We have worked with some of the world's largest companies and we are well-versed in HP's proven approach to creating solution architectures that precisely target our customers' business goals.

Each member of our team brings top-quality skills in analyzing output management needs; identifying, developing, and integrating custom solutions to meet those needs; and providing superior project management. On average, our consultants have seven to ten years of dedicated output management experience and an up-to-date certification from the Project Management Institute.

We help you realize all the benefits of our technical depth, close relationships with leading vendors, and international presence. The end result is a robust output management solution for better business outcomes.

HP Output Management solutions

End-to-end solutions

HP Output Management solutions make it easy for you to deliver business-critical documents from virtually any business application to nearly any destination reliably and efficiently while saving money. Our solutions combine enterprise information delivery software with expert implementation, integration, software support, and customer training services. We make sure you have everything you need to provide a complete end-to-end business solution for your company.

Software products

HP Output Server is the core software platform of any HP Output Management solution. It enables reliable, efficient, and cost-effective document delivery to enterprise output destinations virtually anywhere in the world via print, fax, email, FTP, web, wireless devices, file, and other formats. Add-on software modules are available for enhanced capabilities such as report distribution, web publishing, and multi-language printing, as well as integrations with SAP, Oracle Applications, HP Software, and others.

HP Output Management software products run on a large variety of operating systems and platforms including UNIX, Linux, or Microsoft Windows®.

Implementation and integration services

You can choose from an extensive portfolio of enterprise implementation and integration services specifically designed to assist you in smoothly bringing your HP Output Management solution into your IT environment. Our services team provides planning, implementation, integration, and other customization assistance required to meet your business needs.

This team is available to provide end-to-end enterprise integration, combining HP products and services with software from leading enterprise application providers such as Oracle Corporation (Siebel, PeopleSoft, JD Edwards), EMC Corporation (Documentum), Monotype (Andale), and others.

We can also integrate output management capabilities with forms applications and archiving or content management software, as well as with leading high-availability solutions—including HP Serviceguard and IBM High Availability Cluster Management. This prevents network and equipment failures from disrupting your ability to access critical information.

Support services

When it comes to software support and maintenance services, HP offers a wide range of options so you can rely on the precise level of assistance your company needs.

Our support options include 9x5, 13x5, or 24x7 service hours. As part of your maintenance contract, you get regular defect repair, access to expert personnel to answer any questions you may have, and ongoing software updates—everything you need to maintain an optimally running HP Output Management solution. Your account team also takes requests you may have to enhance the HP Output Management software products or services and feeds them into HP's product enhancement process for continual improvement.

Besides the basic support offerings, we offer advanced implementation and operations enhancement services that include your choice of services such as a system health check, upgrade or migration assistance, performance optimization and tuning, and more.

Customer training services

Training helps you get the most from your solution. HP offers an HP Output Management training curriculum for delivery at HP facilities, on-site at your company, or as self-paced instruction available on a DVD. Training is essential to keeping your employees equipped with the right knowledge to optimally manage and tune your HP Output Management implementation.

A flexible purchase program for your training needs is available to help you plan and budget.

Financing services

To assist with the adoption of the HP Output Management solution, HP Financial Services offers a complete array of leasing and financing options to enable you to work within your budget and ease your cash flow. We make it easy and economical for you to deploy world-class technology complete with hardware, software, and services, on terms tailored to your unique needs.
