

HP Output Management Implementation and Integration Services

Get a tailored enterprise output management solution to meet your needs

Quickly and efficiently deploy your new business-critical information delivery infrastructure.

HP Output Management Implementation and Integration Services offer all the help you need to smoothly deploy an HP Output Management solution. While HP Output Management solutions are very flexible and easy to integrate with other systems, you can do it much faster with help from the experts—HP Output Management Technical Consultants.

HP Output Management Implementation and Integration Services can be a key part of a successful HP Output Management solution—the intelligent link that gets critical documents from virtually any application to nearly any destination reliably, efficiently, and cost-effectively.

Comprehensive services

- **Deployment:** From preliminary planning and equipment delivery to installation, configuration, integration, testing, migration, and staff orientation, HP's highly trained professionals can provide a trouble-free deployment of your HP Output Management solution.
- **Integration with Applications and Destinations** includes integrating legacy and standard applications such as SAP and Oracle® Applications, enterprise systems management such as IBM Tivoli or HP Software, forms packages, archiving solutions, and other systems and data to help you build an output management solution.
- **Production Readiness Review (PRR)** is a standardized procedure for evaluating the readiness of your HP Output Management solution before putting it into production. As part of this comprehensive review, our consultants will verify key system functions and analyze configuration options. This also includes operating system patch levels, HP Output Server patch levels, log file setup and management, and disk space planning and layout relative to your requirements.
- **Go-Live Support** provides onsite support that helps make sure that the new HP Output Management solution seamlessly transitions to a "live" production environment.

Get the most from your software investment

Our team's depth and breadth of experience means that we can work with virtually any technology platform. We can help you develop an output management solution that is tightly integrated with your existing applications environment. Our solutions can support virtually any destination—including printers, fax, email, web and your company's online information portal—and deliver output in numerous file formats.

Using rules that you define, the HP Output Management solution can manage the flow of information between business-critical applications—such as ERP and supply chain systems—as well as forms management, archiving, and document management systems. And you can use leading enterprise system management tools to track the status of all your output jobs and destinations from a single console.

Our solutions also address another key part of output management: making sure that business-critical documents do not "get lost" between the application and the output device. We can integrate output management capabilities with leading high-availability solutions—including HP Serviceguard and IBM High Availability Cluster Management—to prevent network and equipment failures from disrupting your ability to access critical information.

Helping you make a difference

- You accelerate implementation and integration of your HP Output Management solution.
- You get the most from your solution right away.

“HP Output Management Technical Consultants came in, worked diligently to fully comprehend our goals for handling all aspects of the SAP print output, and performed as hard as if they were actual Moen employees. They did a phenomenal job leading us through the implementation and integration of HP Output Server and its companion modules with our business processes.”

—Jim Stachowiak, Senior Technical Consultant, IT Infrastructure Team, Moen Incorporated.

At-a-glance: HP Output Management Implementation and Integration Service

Who we are: HP Output Management Technical Consultants have many years of output management experience. We can work with you to design and implement an output management solution that’s right for your business.

What we do: Based on your output management solution architecture blueprint, we help you build the right architecture to improve the reliability, efficiency and cost-effectiveness of document delivery throughout your enterprise. We also integrate your output management solution with your ERP, legacy, and other applications.

Our experience: Our consultants have an average of 7 to 10 years of dedicated document delivery experience.

Global presence: With highly trained experts around the world, we provide the same responsive service whether you’re based in a remote location or a major market.

Partners: Our partners include Microsoft®, Oracle, and SAP.

Customers: Our customers include Agilent, Allergan, and Moen as well as other Fortune 500 companies worldwide.

Why we’re different

We’re different because we understand that you’re different. Our team can work with you to design an output management solution that’s right for your goals—whether they involve reducing output management costs, improving content delivery, integrating your enterprise output environment with your IT infrastructure, or all of the above. Moreover, our service offerings are comprehensive and encompass an assessment of your enterprise output management and document delivery needs, as well as solution development, deployment, management, and support.

We understand enterprise environments

We’ve helped corporations successfully design and implement output management solutions in unforgiving enterprise environments, where lost or late information can cost millions of dollars. We’ve even helped ourselves. Following HP’s merger with Compaq, we successfully simplified our own output management environment to improve reliability and enable centralized control—saving the company US\$2.5 million per year in the process.¹

Global resources locally

We combine the resources of a large, global enterprise with local support and services that speak your language. With highly trained experts around the world, we provide the same responsive service whether you’re based in a remote location or a major market.

Our people make the difference

Our team has particular expertise in providing output management solutions for complex enterprise environments. We have worked with some of the world’s largest companies and we are well-versed in HP’s proven approach to creating solution architectures that precisely target our customers’ business goals.

Each member of our team brings top-quality skills in analyzing output management needs; identifying, developing, and integrating custom solutions to meet those needs; and providing superior project management. On average, our consultants have 7 to 10 years of dedicated output management experience and an up-to-date certification from the Project Management Institute.

We help you realize all the benefits of our technical depth, close relationships with leading vendors, and international presence. The end result is a robust output management solution for better business outcomes.

HP Output Management solutions

End-to-end solutions

HP Output Management solutions make it easy for you to deliver business-critical documents from virtually any business application to nearly any destination reliably and efficiently while saving money. Our solutions combine enterprise information delivery software with expert implementation, integration, software support, and customer training services. We make sure you have everything you need to provide a complete end-to-end business solution for your company.

Software products

HP Output Server is the core software platform of any HP Output Management solution. It enables reliable, efficient, and cost-effective document delivery to enterprise output destinations virtually anywhere in the world via print, fax, email, FTP, web, wireless devices, file, and other formats. Add-on software modules are available for enhanced capabilities such as report distribution, web publishing, and multi-language printing, as well as integrations with SAP, Oracle Applications, HP Software, and others.

HP Output Management software products run on a large variety of operating systems and platforms including UNIX®, Linux, or Microsoft Windows®.

Implementation and integration services

You can choose from an extensive portfolio of enterprise implementation and integration services specifically designed to assist you in smoothly bringing your HP Output Management solution into your IT environment. Our services team provides planning, implementation, integration, and other customization assistance required to meet your business needs.

This team is available to provide end-to-end enterprise integration, combining HP products and services with software from leading enterprise application providers such as Oracle Corporation (Siebel, PeopleSoft, JD Edwards), EMC Corporation (Documentum), Monotype (Andale), and others.

We can also integrate output management capabilities with forms applications and archiving or content management software, as well as with leading high-availability solutions—including HP Serviceguard and IBM High Availability Cluster Management. This prevents network and equipment failures from disrupting your ability to access critical information.

Support services

When it comes to software support and maintenance services, HP offers a wide range of options so you can rely on the precise level of assistance your company needs.

Our support options include 9x5, 13x5, or 24x7 service hours. As part of your maintenance contract, you get regular defect repair, access to expert personnel to answer any questions you may have, and ongoing software updates—everything you need to maintain an optimally running HP Output Management solution. Your account team also takes requests you may have to enhance the HP Output Management software products or services and feeds them into HP's product enhancement process for continual improvement.

Besides the basic support offerings, we offer advanced implementation and operations enhancement services that include your choice of services such as a system health check, upgrade or migration assistance, performance optimization and tuning, and more.

Customer training services

Training helps you get the most from your solution. HP offers an HP Output Management training curriculum for delivery at HP facilities, on-site at your company, or as self-paced instruction available on a DVD. Training is essential to keeping your employees equipped with the right knowledge to optimally manage and tune your HP Output Management implementation.

A flexible purchase program for your training needs is available to help you plan and budget.

Financing services

To assist with the adoption of the HP Output Management solution, HP Financial Services offers a complete array of leasing and financing options to enable you to work within your budget and ease your cash flow. We make it easy and economical for you to deploy world-class technology complete with hardware, software, and services, on terms tailored to your unique needs.
