

HP Output Manager for HP Software

Extend your systems management software for reliable output delivery

Enable business process continuity and reliable delivery of business-critical documents to multiple destinations across the enterprise.

HP Output Manager for HP Software (formerly HP OpenView) is a module that integrates HP's systems management applications and HP Output Server, the core platform of any HP Output Management solution. An HP Output Management solution is the intelligent link that gets critical documents from virtually any destination reliably and efficiently while saving your company money.

HP Output Server seamlessly integrates with several enterprise systems management applications. One of the most powerful and important of these integrations is HP Output Manager for HP Software.

Integrated output management

- **Integrate output management into a systems management strategy.** HP Software enables reliable IT services with the agility that the enterprise demands by managing an enterprise's applications, servers, and network. Now HP Output Manager for HP Software provides IT administrators with a more complete system-wide perspective by integrating event and server status from output destinations and print jobs.
- **Help ensure the organization's effectiveness.** Apply valuable management strategies and techniques, such as proactive management, to critical output resources.
- **Stay informed.** HP Output Manager for HP Software automatically forwards HP Output Server alerts and events to the HP Software event monitor, so these important messages have greater visibility.
- **Get up-to-date compatibility.** HP Output Manager for HP Software supports the latest versions of HP Output Server and HP Software.

Faster problem resolution with improved helpdesk operations

- **Improve IT and helpdesk productivity.** By handling all output with one management tool, HP Output Manager for HP Software lays the groundwork to make IT and helpdesk staff more efficient and effective.

- **Expand IT perspective.** Access to printer and job status information allows administrators to rapidly isolate and identify the root cause of any problem—before it impacts the business process.
- **Direct more eyes to the problem.** By distributing alerts and events to a wider set of tools and resources, printer-related problems receive quicker attention and resolution.
- **Respond effectively to output issues.** Administrators can customize and monitor event messages based on job status, severity, or according to user-specified time intervals, enabling IT staff to quickly and easily detect and resolve problems. Messages can provide detailed, contextual information about print jobs and include instructional text to help ensure that issues are resolved in the most efficient and appropriate manner.
- **Receive enhanced logging and tracing.** Get specific error information, such as device location and domain, and log these error messages appropriately. This enables the helpdesk to deliver faster problem resolution.
- **Monitor critical SAP servers.** Fortify enterprise infrastructure by monitoring SAP servers that are integral to reliable information delivery, including SAP Output Management Server Callback (OMSCB) and SAPconnect.

Increase the value of your HP Software with the power of complete output management and instant status reporting.

HP Output Manager for HP Software is the integration point between HP Output Server and HP Operations Center software. By receiving event and status information from critical jobs and printers at the HP Operations Center event console, IT staff can more proactively respond to problems that are the result of document delivery failures.

HP Output Management solutions

End-to-end solutions

HP Output Management solutions make it easy for you to deliver business-critical documents from virtually any business application to nearly any destination reliably and efficiently while saving money. Our solutions combine enterprise information delivery software with expert implementation, integration, software support, and customer training services. We make sure you have everything you need to provide a complete end-to-end business solution for your company.

Software products

HP Output Server is the core software platform of any HP Output Management solution. It enables reliable, efficient, and cost-effective document delivery to enterprise output destinations virtually anywhere in the world via print, fax, email, FTP, web, wireless devices, file, and other formats. Add-on software modules are available for enhanced capabilities such as report distribution, web publishing, and multi-language printing, as well as integrations with SAP, Oracle® Applications, HP Software, and others.

HP Output Management software products run on a large variety of operating systems and platforms including UNIX®, Linux, or Microsoft® Windows®.

Implementation and integration services

You can choose from an extensive portfolio of enterprise implementation and integration services specifically designed to assist you in smoothly bringing your HP Output Management solution into your IT environment. Our services team provides planning, implementation, integration, and other customization assistance required to meet your business needs.

This team is available to provide end-to-end enterprise integration, combining HP products and services with software from leading enterprise application providers such as Oracle Corporation (Siebel, PeopleSoft, JD Edwards), EMC Corporation (Documentum), Monotype (Andale), and others.

We can also integrate output management capabilities with forms applications and archiving or content management software, as well as with leading high-availability solutions—including HP Serviceguard and IBM High Availability Cluster Management. This prevents network and equipment failures from disrupting your ability to access critical information.

Support services

When it comes to software support and maintenance services, HP offers a wide range of options so you can rely on the precise level of assistance your company needs.

Our support options include 9x5, 13x5, or 24x7 service hours. As part of your maintenance contract, you get regular defect repair, access to expert personnel to answer any questions you may have, and ongoing software updates—everything you need to maintain an optimally running HP Output Management solution. Your account team also takes requests you may have to enhance the HP Output Management software products or services and feeds them into HP's product enhancement process for continual improvement.

Besides the basic support offerings, we offer advanced implementation and operations enhancement services that include your choice of services such as a system health check, upgrade or migration assistance, performance optimization and tuning, and more.

Customer training services

Training helps you get the most from your solution. HP offers an HP Output Management training curriculum for delivery at HP facilities, on-site at your company, or as self-paced instruction available on a DVD. Training is essential to keeping your employees equipped with the right knowledge to optimally manage and tune your HP Output Management implementation.

A flexible purchase program for your training needs is available to help you plan and budget.

Financing services

To assist with the adoption of the HP Output Management solution, HP Financial Services offers a complete array of leasing and financing options to enable you to work within your budget and ease your cash flow. We make it easy and economical for you to deploy world-class technology complete with hardware, software, and services, on terms tailored to your unique needs.
