

HP Output Management Implementation Services for Oracle® Applications

Get more from your Oracle Applications with reliable and efficient information delivery

Accelerate implementation and integration of the HP Output Management solution with your Oracle Applications.

Oracle Applications and their growing portfolio of enterprise resource planning (ERP) and customer relationship management (CRM) products, including PeopleSoft, Siebel, and JD Edwards, generate thousands of business-critical reports every day. Making it easy to get information output from the Oracle Applications product family and delivering it to the right destinations is critical. HP Output Management Implementation Services for Oracle Applications can help.

HP Output Management Implementation Services for Oracle Applications can be a key part of a successful HP Output Management solution—the intelligent link that gets critical documents from virtually any application to nearly any destination reliably, efficiently, and cost effectively.

Our team's depth and breadth of experience means that we can integrate Oracle Applications output with virtually any output environment. With our global reach, we can provide the same level of service whether you're located in a major market or in a remote location. Plus, HP and Oracle have worked closely together for more than 25 years to provide excellent results for our enterprise customers.

Comprehensive services

HP Output Management Implementation Services for Oracle Applications provide a complete solution mapped to your specific output management and document delivery needs. Our experienced consultants can help you implement a solution that simplifies your Oracle Applications output environment and delivers key information more reliably and efficiently.

- **Assessment and planning services** use proven methodologies specifically for Oracle environments to analyze and design the right solution based upon your business needs.
- **Integration capabilities** help you integrate and manage your information output from your Oracle Applications without costly modifications.
- **Consulting solutions** make sure that you get the highest performance from your output management solution. Our experts also customize the deployment to meet the unique needs of your environment.

Get the most from your software

HP Output Management Implementation Services for Oracle Applications can help you get more value from your Oracle system by making critical information more accessible to users. You enhance your Oracle output capabilities by implementing a solution based on HP Output Manager for Oracle Applications—integration software prepackaged with the HP Output Server platform. You can make sure business-critical documents reach their intended destinations with an easy-to-use interface that requires no customization.

We can help you develop an integrated output management solution that collects, transforms, monitors, and delivers output from your Oracle Applications environment—without requiring you to make costly modifications to it. Our solutions can support virtually any destination—including printers, fax, email, web, and your company's online information portal—and deliver output in numerous file formats.

We can also design rules-based solutions that integrate output from Oracle Applications with forms management, archiving, and document management systems—or with your online enterprise portal. And you can use leading enterprise system management tools to track the status of all your Oracle Applications output jobs from a single console.

Helping you make a difference

- You accelerate implementation and integration of your HP Output Management solution.
- You get the most from your output management solution right away.

“We output over 1.3 million documents per month [from Oracle Applications] and using HP Output Server it is now all controlled centrally. It is a very flexible off-the-shelf solution...and gives us an excellent return on our IT investment.”

—Alan Davidson, Senior Technical Architect, Agilent

At-a-glance: HP Output Management Implementation Services for Oracle Applications

Who we are: HP Output Management Technical Consultants have many years of output management experience. We can work with you to design and implement an output management solution that’s right for your business.

What we do: Based on your output management solution architecture blueprint, we help you build the right architecture to improve the reliability, efficiency, and cost-effectiveness of document delivery throughout your enterprise. We also integrate your output management solution with your ERP, legacy, and other applications.

Our experience: Our consultants have an average of 7 to 10 years of dedicated document delivery experience.

Global presence: With highly trained experts around the world, we provide the same responsive service whether you’re based in a remote location or a major market.

Partners: Our partners include Microsoft®, Oracle, and SAP.

Customers: Our customers include Agilent, Allergan, and Moen as well as other Fortune 500 companies worldwide.

Why we’re different

We’re different because we understand that you’re different. Our team can work with you to design an output management solution that’s right for your goals—whether they involve reducing output management costs, improving content delivery, integrating your enterprise output environment with your IT infrastructure, or all of the above. Moreover, our service offerings are comprehensive and encompass an assessment of your enterprise output management and document delivery needs, as well as solution development, deployment, management, and support.

We understand enterprise environments

HP and Oracle have worked together for more than 25 years. We’ve helped corporations successfully design and implement output management solutions in unforgiving enterprise environments, where lost or late information can cost millions of dollars. For example, we worked closely with Agilent to develop flexible, centralized control of the approximately 1.3 million documents per month generated by its Oracle Applications system. Our solution allowed Agilent to monitor Oracle output and more than 4,000 destination devices from a single console, thereby simplifying administration and providing faster and more reliable report delivery. HP even implemented Siebel CRM to unite its own sales force, marketing personnel, call center professionals, and partner network into a single, comprehensive customer information system.

Global resources locally

We combine the resources of a large, global enterprise with local support and services that speak your language. With highly trained experts around the world, we provide the same responsive service whether you’re based in a remote location or a major market.

Our people make the difference

Our team has particular expertise in providing output management solutions for complex enterprise environments. We have worked with some of the world’s largest companies and we are well-versed in HP’s proven approach to creating solution architectures that precisely target our customers’ business goals.

Each member of our team brings top-quality skills in analyzing output management needs; identifying, developing, and integrating custom solutions to meet those needs; and providing superior project management. On average, our consultants have 7 to 10 years of dedicated output management experience and an up-to-date certification from the Project Management Institute.

We help you realize all the benefits of our technical depth, close relationships with leading vendors, and international presence. The end result is a robust output management solution for better business outcomes.

HP Output Management solutions

End-to-end solutions

HP Output Management solutions make it easy for you to deliver business-critical documents from virtually any business application to nearly any destination reliably and efficiently while saving money. Our solutions combine enterprise information delivery software with expert implementation, integration, software support, and customer training services. We make sure you have everything you need to provide a complete end-to-end business solution for your company.

Software products

HP Output Server is the core software platform of any HP Output Management solution. It enables reliable, efficient, and cost-effective document delivery to enterprise output destinations virtually anywhere in the world via print, fax, email, FTP, web, wireless devices, file, and other formats. Add-on software modules are available for enhanced capabilities such as report distribution, web publishing, and multi-language printing, as well as integrations with SAP, Oracle Applications, HP Software, and others.

HP Output Management software products run on a large variety of operating systems and platforms including UNIX®, Linux, or Microsoft Windows®.

Implementation and integration services

You can choose from an extensive portfolio of enterprise implementation and integration services specifically designed to assist you in smoothly bringing your HP Output Management solution into your IT environment. Our services team provides planning, implementation, integration, and other customization assistance required to meet your business needs.

This team is available to provide end-to-end enterprise integration, combining HP products and services with software from leading enterprise application providers such as Oracle Corporation (Siebel, PeopleSoft, JD Edwards), EMC Corporation (Documentum), Monotype (Andale), and others.

We can also integrate output management capabilities with forms applications and archiving or content management software, as well as with leading high-availability solutions—including HP Serviceguard and IBM High Availability Cluster Management. This prevents network and equipment failures from disrupting your ability to access critical information.

Support services

When it comes to software support and maintenance services, HP offers a wide range of options so you can rely on the precise level of assistance your company needs.

Our support options include 9x5, 13x5, or 24x7 service hours. As part of your maintenance contract, you get regular defect repair, access to expert personnel to answer any questions you may have, and ongoing software updates—everything you need to maintain an optimally running HP Output Management solution. Your account team also takes requests you may have to enhance the HP Output Management software products or services and feeds them into HP's product enhancement process for continual improvement.

Besides the basic support offerings, we offer advanced implementation and operations enhancement services that include your choice of services such as a system health check, upgrade or migration assistance, performance optimization and tuning, and more.

Customer training services

Training helps you get the most from your solution. HP offers an HP Output Management training curriculum for delivery at HP facilities, on-site at your company, or as self-paced instruction available on a DVD. Training is essential to keeping your employees equipped with the right knowledge to optimally manage and tune your HP Output Management implementation.

A flexible purchase program for your training needs is available to help you plan and budget.

Financing services

To assist with the adoption of the HP Output Management solution, HP Financial Services offers a complete array of leasing and financing options to enable you to work within your budget and ease your cash flow. We make it easy and economical for you to deploy world-class technology complete with hardware, software, and services, on terms tailored to your unique needs.
