Η HP παραμένει υπεύθυνη για τη συμμόρφωση του Υπεργολάβου Επεξεργασίας με τις υποχρεώσεις του παρόντος Παραρτήματος Επεξεργασίας Δεδομένων. Η HP θα διασφαλίζει ότι οι Υπεργολάβοι Επεξεργασίας στους οποίους η HP διαβιβάζει Δεδομένα Προσωπικού Χαρακτήρα Πελατών θα συνάπτουν έγγραφες συμβάσεις με την HP, οι οποίες θα απαιτούν από τους Υπεργολάβους Επεξεργασίας να συμμορφώνονται με όρους που παρέχουν το ίδιο επίπεδο προστασίας με τους όρους που ορίζονται στο παρόν Παράρτημα Επεξεργασίας Δεδομένων. Η HP θα διαθέτει στον Πελάτη τον ισχύοντα κατάλογο Υπεργολάβων Επεξεργασίας για τις Υπηρεσίες που καλύπτονται από τη Συμφωνία Παροχής Υπηρεσιών <https://www.hp.com/us-en/privacy/sub-processor.html>.
- 4.2 Η HP μπορεί ανά πάσα στιγμή και χωρίς αιτιολόγηση να ορίσει νέο Υπεργολάβο Επεξεργασίας, υπό την προϋπόθεση ότι ο Πελάτης έχει λάβει ειδοποίηση δέκα (10) ημέρες νωρίτερα και ο Πελάτης δεν αντιτίθεται δεόντως σε τέτοιες αλλαγές εντός αυτού του χρονικού πλαισίου. Οι δέουσες αντιρρήσεις πρέπει να περιέχουν εύλογους και τεκμηριωμένους λόγους σχετικά με τη μη συμμόρφωση ενός Υπεργολάβου Επεξεργασίας με τους ισχύοντες Νόμους περί Προστασίας Δεδομένων και Ιδιωτικής Ζωής. Αν, κατά την εύλογη γνώμη της HP, οι αντιρρήσεις αυτές είναι εύλογες, η HP δεν θα χρησιμοποιεί τον εν λόγω Υπεργολάβο Επεξεργασίας στο πλαίσιο της επεξεργασίας Δεδομένων Προσωπικού Χαρακτήρα Πελατών. Σε αυτές τις περιπτώσεις, η HP θα καταβάλει εύλογες προσπάθειες για (i) να διαθέσει στον Πελάτη μια αλλαγή στις Υπηρεσίες της HP ή (ii) να προτείνει αλλαγή στη διαμόρφωση ή τη χρήση των Υπηρεσιών από τον Πελάτη, ώστε να αποφευχθεί η επεξεργασία Δεδομένων Προσωπικού Χαρακτήρα Πελατών από τον Υπεργολάβο Επεξεργασίας στον οποίον αντιτίθεται. Εάν η HP δεν είναι σε θέση να διαθέσει την εν λόγω αλλαγή εντός εύλογου χρονικού διαστήματος, το οποίο δεν θα υπερβαίνει τις ενενήντα (90) ημέρες, ο Πελάτης μπορεί, παρέχοντας γραπτή ειδοποίηση στην HP, να τερματίσει την Υπηρεσία που δεν μπορεί να παρασχεθεί από την HP χωρίς τη χρήση του Υπεργολάβου Επεξεργασίας στον ο Πελάτης οποίον έχει αντιτεθεί, παρέχοντας έγγραφη ειδοποίηση στην HP. Όπου εφαρμόζεται ο PIPL, η HP θα ζητά εκ των προτέρων την άδεια του Πελάτη για να διορίσει νέο Υπεργολάβο Επεξεργασίας. Ο Πελάτης πρέπει να απαντήσει στο αίτημα της HP εντός δέκα (10) ημερών. Αν ο Πελάτης εναντιωθεί στην αλλαγή, η HP δεν θα χρησιμοποιήσει τον εν λόγω Υπεργολάβο Επεξεργασίας στο πλαίσιο της επεξεργασίας των Δεδομένων Προσωπικού Χαρακτήρα Πελάτη. Στις περιπτώσεις αυτές, η HP θα καταβάλει εύλογές προσπάθειες (i) για να διαθέσει στον Πελάτη μια αλλαγή στις Υπηρεσίες της HP ή (ii) για να προτείνει μια αλλαγή στις ρυθμίσεις ή στην χρήση των Υπηρεσιών από τον Πελάτη, για την αποφυγή της επεξεργασίας των Δεδομένων Προσωπικού Χαρακτήρα του Πελάτη από τον Υπεργολάβο Επεξεργασίας στον οποίον εναντιώθηκε. Αν η HP δεν μπορέσει να διαθέσει την εν λόγω αλλαγή εντός εύλογου χρονικού διαστήματος, το οποίο δεν θα υπερβαίνει τις ενενήντα (90) ημέρες, ο Πελάτης δύναται, παρέχοντας έγγραφη ειδοποίηση στην HP, να καταγγείλει την παροχή της Υπηρεσίας η οποία δεν μπορεί να παρασχεθεί από την HP χωρίς την χρήση του Υπεργολάβου Επεξεργασίας στον οποίον έχει εναντιωθεί ο Πελάτης, παρέχοντας έγγραφη ειδοποίηση στην HP.

5 ΣΥΜΒΑΝΤΑ ΔΕΔΟΜΕΝΩΝ ΠΡΟΣΩΠΙΚΟΥ ΧΑΡΑΚΤΗΡΑ

- 5.1 Η HP θα ενημερώνει τον Πελάτη, χωρίς αδικαιολόγητη καθυστέρηση, αν η HP αντιληφθεί οποιοδήποτε Συμβάν Δεδομένων Προσωπικού Χαρακτήρα που αφορά Δεδομένα Προσωπικού Χαρακτήρα Πελατών και θα λαμβάνει μέτρα που εύλογα μπορεί να απαιτήσει ο Πελάτης, εντός εύλογου χρονικού διαστήματος, για τη διόρθωση του Συμβάντος Δεδομένων Προσωπικού Χαρακτήρα και την παροχή περαιτέρω πληροφοριών που εύλογα μπορεί να απαιτήσει ο Πελάτης. Η HP διατηρεί το δικαίωμα να χρεώσει διοικητικό τέλος για βοήθεια που παρέχεται στο πλαίσιο της παρούσας Ρήτηρας 5.1, εκτός εάν και στο βαθμό που ο Πελάτης αποδείξει ότι η βοήθεια αυτή απαιτείται λόγω μη συμμόρφωσης της HP με το παρόν Παράρτημα Επεξεργασίας Δεδομένων.

- (b) These Clauses are without prejudice to obligations to which the data exporter is subject by virtue of Regulation (EU) 2016/679.

Clause 3

Third-party beneficiaries

- (a) Data subjects may invoke and enforce these Clauses, as third-party beneficiaries, against the data exporter and/or data importer, with the following exceptions:

Clause 6

Description of the transfer(s)

The details of the transfer(s), and in particular the categories of personal data that are transferred and the purpose(s) for which they are transferred, are specified in Annex I.B.

SECTION II – OBLIGATIONS OF THE PARTIES

Clause 8

Data protection safeguards

The data exporter warrants that it has used reasonable efforts to determine that the data importer is able, through the implementation of appropriate technical and organisational measures, to satisfy its obligations under these Clauses.

8.1 Instructions

- (a) The data importer shall process the personal data only on documented instructions from the data exporter. The data exporter may give such instructions throughout the duration of the contract.
- (b) The data importer shall immediately inform the data exporter if it is unable to follow those instructions.

8.2 Purpose limitation

The data importer shall process the personal data only for the specific purpose(s) of the transfer, as set out in Annex I.B, unless on further instructions from the data exporter.

8.3 Transparency

On request, the data exporter shall make a copy of these Clauses, including the Appendix as completed by the Parties, available to the data subject free of charge. To the extent necessary to protect business secrets or other confidential information, including the measures described in Annex II and personal data, the data exporter may redact part of the text of the Appendix to these Clauses prior to sharing a copy, but shall provide a meaningful summary where the data subject would otherwise not be able to understand the its content or exercise his/her rights. On request, the Parties shall provide the data subject with the reasons for the redactions, to the extent possible without revealing the redacted information. This Clause is without prejudice to the obligations of the data exporter under Articles 13 and 14 of Regulation (EU) 2016/679.

8.4 Accuracy

If the data importer becomes aware that the personal data it has received is inaccurate, or has become outdated, it shall inform the data exporter without undue delay. In this case, the data importer shall cooperate with the data exporter to erase or rectify the data.

8.5 Duration of processing and erasure or return of data

Processing by the data importer shall only take place for the duration specified in Annex I.B. After the end of the provision of the processing services, the data importer shall, at the choice of the data exporter, delete all personal data processed on behalf of the data exporter and certify to the data exporter that it has done so, or return to the data exporter all personal data processed on its behalf and delete existing copies. Until the data is deleted or returned, the data importer shall continue to ensure compliance with these Clauses. In case of local laws applicable to the data importer that prohibit return or deletion of the personal data, the data importer warrants that it will continue to ensure compliance with these Clauses and will only process it to the extent and for as long as required under that local law. This is without prejudice to Clause 14, in particular the requirement for the data importer under Clause 14(e) to notify the data exporter throughout the duration of the contract if

it has reason to believe that it is or has become subject to laws or practices not in line with the requirements under Clause 14(a).

8.6 Security of processing

- (a) The data importer and, during transmission, also the data exporter shall implement appropriate technical and organisational measures to ensure the security of the data, including protection against a breach of security leading to accidental or unlawful destruction, loss, alteration, unauthorised disclosure or access to that data (hereinafter 'personal data breach'). In assessing the appropriate level of security, the Parties shall take due account of the state of the art, the costs of implementation, the nature, scope, context and purpose(s) of processing and the risks involved in the processing for the data subjects. The Parties shall in particular consider having recourse to encryption or pseudonymisation, including during transmission, where the purpose of processing can be fulfilled in that manner. In case of pseudonymisation, the additional information for attributing the personal data to a specific data subject shall, where possible, remain under the exclusive control of the data exporter. In complying with its obligations under this paragraph, the data importer shall at least implement the technical and organisational measures specified in Annex II. The data importer shall carry out regular checks to ensure that these measures continue to provide an appropriate level of security.
- (b) The data importer shall grant access to the personal data to members of its personnel only to the extent strictly necessary for the implementation, management and monitoring of the contract. It shall ensure that persons authorised to process the personal data have committed themselves to confidentiality or are under an appropriate statutory obligation of confidentiality.
- (c) In the event of a personal data breach concerning personal data processed by the data importer under these Clauses, the data importer shall take appropriate measures to address the breach, including measures to mitigate its adverse effects. The data importer shall also notify the data exporter without undue delay after having become aware of the breach. Such notification shall contain the details of a contact point where more information can be obtained, a description of the nature of the breach (including, where possible, categories and approximate number of data subjects and personal data records concerned), its likely consequences and the measures taken or proposed to address the breach including, where appropriate, measures to mitigate its possible adverse effects. Where, and in so far as, it is not possible to provide all information at the same time, the initial notification shall contain the information then available and further information shall, as it becomes available, subsequently be provided without undue delay.
- (d) The data importer shall cooperate with and assist the data exporter to enable the data exporter to comply with its obligations under Regulation (EU) 2016/679, in particular to notify the competent supervisory authority and the affected data subjects, taking into account the nature of processing and the information available to the data importer.

8.7 Sensitive data

Where the transfer involves personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, genetic data, or biometric data for the purpose of uniquely identifying a natural person, data concerning health or a person's sex life or sexual orientation, or data relating to criminal convictions and offences (hereinafter 'sensitive data'), the data importer shall apply the specific restrictions and/or additional safeguards described in Annex I.B.

8.8 Onward transfers

The data importer shall only disclose the personal data to a third party on documented instructions from the data exporter. In addition, the data may only be disclosed to a third party located outside the European Union (in the same country as the data importer or in another third country, hereinafter 'onward transfer') if the third party is or agrees to be bound by these Clauses, under the appropriate Module, or if:

- (a) the onward transfer is to a country benefitting from an adequacy decision pursuant to Article 45 of Regulation (EU) 2016/679 that covers the onward transfer;
- (b) the third party otherwise ensures appropriate safeguards pursuant to Articles 46 or 47 Regulation of (EU) 2016/679 with respect to the processing in question;
- (c) the onward transfer is necessary for the establishment, exercise or defence of legal claims in the context of specific administrative, regulatory or judicial proceedings; or
- (d) the onward transfer is necessary in order to protect the vital interests of the data subject or of another natural person.

Any onward transfer is subject to compliance by the data importer with all the other safeguards under these Clauses, in particular purpose limitation.

8.9 Documentation and compliance

- (a) The data importer shall promptly and adequately deal with enquiries from the data exporter that relate to the processing under these Clauses.
- (b) The Parties shall be able to demonstrate compliance with these Clauses. In particular, the data importer shall keep appropriate documentation on the processing activities carried out on behalf of the data exporter.
- (c) The data importer shall make available to the data exporter all information necessary to demonstrate compliance with the obligations set out in these Clauses and at the data exporter's request, allow for and contribute to audits of the processing activities covered by these Clauses, at reasonable intervals or if there are indications of non-compliance. In deciding on a review or audit, the data exporter may take into account relevant certifications held by the data importer.
- (d) The data exporter may choose to conduct the audit by itself or mandate an independent auditor. Audits may include inspections at the premises or physical facilities of the data importer and shall, where appropriate, be carried out with reasonable notice.

- (e) The Parties shall make the information referred to in paragraphs (b) and (c), including the results of any audits, available to the competent supervisory authority on request.

Clause 9

Use of sub-processors

- (a) **GENERAL WRITTEN AUTHORISATION** The data importer has the data exporter's general authorisation for the engagement of sub-processor(s) from an agreed list. The data importer shall specifically inform the data exporter in writing of any intended changes to that list through the addition or replacement of sub-processors at least 90 days in advance, thereby giving the data exporter sufficient time to be able to object to such changes prior to the engagement of the sub-processor(s). The data importer shall provide the data exporter with the information necessary to enable the data exporter to exercise its right to object.
- (b) Where the data importer engages a sub-processor to carry out specific processing activities (on behalf of the data exporter), it shall do so by way of a written contract that provides for, in substance, the same data protection obligations as those binding the data importer under these Clauses, including in terms of third-party beneficiary rights for data subjects. The Parties agree that, by complying with this Clause, the data importer fulfils its obligations under Clause 8.8. The data importer shall ensure that the sub-processor complies with the obligations to which the data importer is subject pursuant to these Clauses.
- (c) The data importer shall provide, at the data exporter's request, a copy of such a sub-processor agreement and any subsequent amendments to the data exporter. To the extent necessary to protect business secrets or other confidential information, including personal data, the data importer may redact the text of the agreement prior to sharing a copy.
- (d) The data importer shall remain fully responsible to the data exporter for the performance of the sub-processor's obligations under its contract with the data importer. The data importer shall notify the data exporter of any failure by the sub-processor to fulfil its obligations under that contract.
- (e) The data importer shall agree a third-party beneficiary clause with the sub-processor whereby – in the event the data importer has factually disappeared, ceased to exist in law or has become insolvent – the data exporter shall have the right to terminate the sub-processor contract and to instruct the sub-processor to erase or return the personal data.

Clause 10

Data subject rights

- (a) The data importer shall promptly notify the data exporter of any request it has received from a data subject. It shall not respond to that request itself unless it has been authorised to do so by the data exporter.
- (b) The data importer shall assist the data exporter in fulfilling its obligations to respond to data subjects' requests for the exercise of their rights under Regulation (EU) 2016/679. In this regard, the Parties shall set out in Annex II the appropriate technical and organisational measures, taking into account the nature

of the processing, by which the assistance shall be provided, as well as the scope and the extent of the assistance required.

- (c) In fulfilling its obligations under paragraphs (a) and (b), the data importer shall comply with the instructions from the data exporter.

Clause 11

Redress

- (a) The data importer shall inform data subjects in a transparent and easily accessible format, through individual notice or on its website, of a contact point authorised to handle complaints. It shall deal promptly with any complaints it receives from a data subject.
- (b) In case of a dispute between a data subject and one of the Parties as regards compliance with these Clauses, that Party shall use its best efforts to resolve the issue amicably in a timely fashion. The Parties shall keep each other informed about such disputes and, where appropriate, cooperate in resolving them.
- (c) Where the data subject invokes a third-party beneficiary right pursuant to Clause 3, the data importer shall accept the decision of the data subject to:
 - (i) lodge a complaint with the supervisory authority in the Member State of his/her habitual residence or place of work, or the competent supervisory authority pursuant to Clause 13;
 - (ii) refer the dispute to the competent courts within the meaning of Clause 18.
- (d) The Parties accept that the data subject may be represented by a not-for-profit body, organisation or association under the conditions set out in Article 80(1) of Regulation (EU) 2016/679.
- (e) The data importer shall abide by a decision that is binding under the applicable EU or Member State law.
- (f) The data importer agrees that the choice made by the data subject will not prejudice his/her substantive and procedural rights to seek remedies in accordance with applicable laws.

Clause 12

Liability

- (a) Each Party shall be liable to the other Party/ies for any damages it causes the other Party/ies by any breach of these Clauses.
- (b) The data importer shall be liable to the data subject, and the data subject shall be entitled to receive compensation, for any material or non-material damages the data importer or its sub-processor causes the data subject by breaching the third-party beneficiary rights under these Clauses.
- (c) Notwithstanding paragraph (b), the data exporter shall be liable to the data subject, and the data subject shall be entitled to receive compensation, for any material or non-material damages the data exporter or the data importer (or its sub-processor) causes the data subject by breaching the third-party beneficiary

rights under these Clauses. This is without prejudice to the liability of the data exporter and, where the data exporter is a processor acting on behalf of a controller, to the liability of the controller under Regulation (EU) 2016/679 or Regulation (EU) 2018/1725, as applicable.

- (d) The Parties agree that if the data exporter is held liable under paragraph (c) for damages caused by the data importer (or its sub-processor), it shall be entitled to claim back from the data importer that part of the compensation corresponding to the data importer's responsibility for the damage.
- (e) Where more than one Party is responsible for any damage caused to the data subject as a result of a breach of these Clauses, all responsible Parties shall be jointly and severally liable and the data subject is entitled to bring an action in court against any of these Parties.
- (f) The Parties agree that if one Party is held liable under paragraph (e), it shall be entitled to claim back from the other Party/ies that part of the compensation corresponding to its/their responsibility for the damage.
- (g) The data importer may not invoke the conduct of a sub-processor to avoid its own liability.

Clause 13

Supervision

- (a) Where the data exporter is established in an EU Member State: The supervisory authority with responsibility for ensuring compliance by the data exporter with Regulation (EU) 2016/679 as regards the data transfer, as indicated in Annex I.C, shall act as competent supervisory authority.

Where the data exporter is not established in an EU Member State, but falls within the territorial scope of application of Regulation (EU) 2016/679 in accordance with its Article 3(2) and has appointed a representative pursuant to Article 27(1) of Regulation (EU) 2016/679: The supervisory authority of the Member State in which the representative within the meaning of Article 27(1) of Regulation (EU) 2016/679 is established, as indicated in Annex I.C, shall act as competent supervisory authority.

Where the data exporter is not established in an EU Member State, but falls within the territorial scope of application of Regulation (EU) 2016/679 in accordance with its Article 3(2) without however having to appoint a representative pursuant to Article 27(2) of Regulation (EU) 2016/679: The supervisory authority of one of the Member States in which the data subjects whose personal data is transferred under these Clauses in relation to the offering of goods or services to them, or whose behaviour is monitored, are located, as indicated in Annex I.C, shall act as competent supervisory authority.

- (b) The data importer agrees to submit itself to the jurisdiction of and cooperate with the competent supervisory authority in any procedures aimed at ensuring compliance with these Clauses. In particular, the data importer agrees to respond to enquiries, submit to audits and comply with the measures adopted by the supervisory authority, including remedial and compensatory measures. It shall provide the supervisory authority with written confirmation that the necessary actions have been taken.

SECTION III - LOCAL LAWS AND OBLIGATIONS IN CASE OF ACCESS BY PUBLIC AUTHORITIES

Local laws and practices affecting compliance with the Clauses

- (a) The Parties warrant that they have no reason to believe that the laws and practices in the third country of destination applicable to the processing of the personal data by the data importer, including any requirements to disclose personal data or measures authorising access by public authorities, prevent the data importer from fulfilling its obligations under these Clauses. This is based on the understanding that laws and practices that respect the essence of the fundamental rights and freedoms and do not exceed what is necessary and proportionate in a democratic society to safeguard one of the objectives listed in Article 23(1) of Regulation (EU) 2016/679, are not in contradiction with these Clauses.
- (b) The Parties declare that in providing the warranty in paragraph (a), they have taken due account in particular of the following elements:
 - (i) the specific circumstances of the transfer, including the length of the processing chain, the number of actors involved and the transmission channels used; intended onward transfers; the type of recipient; the purpose of processing; the categories and format of the transferred personal data; the economic sector in which the transfer occurs; the storage location of the data transferred;
 - (ii) the laws and practices of the third country of destination – including those requiring the disclosure of data to public authorities or authorising access by such authorities – relevant in light of the specific circumstances of the transfer, and the applicable limitations and safeguards;
 - (iii) any relevant contractual, technical or organisational safeguards put in place to supplement the safeguards under these Clauses, including measures applied during transmission and to the processing of the personal data in the country of destination.
- (c) The data importer warrants that, in carrying out the assessment under paragraph (b), it has made its best efforts to provide the data exporter with relevant information and agrees that it will continue to cooperate with the data exporter in ensuring compliance with these Clauses.
- (d) The Parties agree to document the assessment under paragraph (b) and make it available to the competent supervisory authority on request.
- (e) The data importer agrees to notify the data exporter promptly if, after having agreed to these Clauses and for the duration of the contract, it has reason to believe that it is or has become subject to laws or practices not in line with the requirements under paragraph (a), including following a change in the laws of the third country or a measure (such as a disclosure request) indicating an application of such laws in practice that is not in line with the requirements in paragraph (a).
- (f) Following a notification pursuant to paragraph (e), or if the data exporter otherwise has reason to believe that the data importer can no longer fulfil its obligations under these Clauses, the data exporter shall promptly identify appropriate measures (e.g. technical or organisational measures to ensure security and confidentiality) to be adopted by the data exporter and/or data importer to address the situation. The data exporter shall suspend the data transfer if it considers that no appropriate safeguards for such transfer

can be ensured, or if instructed by the competent supervisory authority to do so. In this case, the data exporter shall be entitled to terminate the contract, insofar as it concerns the processing of personal data under these Clauses. If the contract involves more than two Parties, the data exporter may exercise this right to termination only with respect to the relevant Party, unless the Parties have agreed otherwise. Where the contract is terminated pursuant to this Clause, Clause 16(d) and (e) shall apply.

Clause 15

Obligations of the data importer in case of access by public authorities

15.1 Notification

- (a) The data importer agrees to notify the data exporter and, where possible, the data subject promptly (if necessary, with the help of the data exporter) if it:
 - (i) receives a legally binding request from a public authority, including judicial authorities, under the laws of the country of destination for the disclosure of personal data transferred pursuant to these Clauses; such notification shall include information about the personal data requested, the requesting authority, the legal basis for the request and the response provided; or
 - (ii) becomes aware of any direct access by public authorities to personal data transferred pursuant to these Clauses in accordance with the laws of the country of destination; such notification shall include all information available to the importer.
- (b) If the data importer is prohibited from notifying the data exporter and/or the data subject under the laws of the country of destination, the data importer agrees to use its best efforts to obtain a waiver of the prohibition, with a view to communicating as much information as possible, as soon as possible. The data importer agrees to document its best efforts in order to be able to demonstrate them on request of the data exporter.
- (c) Where permissible under the laws of the country of destination, the data importer agrees to provide the data exporter, at regular intervals for the duration of the contract, with as much relevant information as possible on the requests received (in particular, number of requests, type of data requested, requesting authority/ies, whether requests have been challenged and the outcome of such challenges, etc.).
- (d) The data importer agrees to preserve the information pursuant to paragraphs (a) to (c) for the duration of the contract and make it available to the competent supervisory authority on request.
- (e) Paragraphs (a) to (c) are without prejudice to the obligation of the data importer pursuant to Clause 14(e) and Clause 16 to inform the data exporter promptly where it is unable to comply with these Clauses.

15.2 Review of legality and data minimisation

- (a) The data importer agrees to review the legality of the request for disclosure, in particular whether it remains within the powers granted to the requesting public authority, and to challenge the request if, after careful assessment, it concludes that there are reasonable grounds to consider that the request is unlawful under the laws of the country of destination, applicable obligations under international law and

principles of international comity. The data importer shall, under the same conditions, pursue possibilities of appeal. When challenging a request, the data importer shall seek interim measures with a view to suspending the effects of the request until the competent judicial authority has decided on its merits. It shall not disclose the personal data requested until required to do so under the applicable procedural rules. These requirements are without prejudice to the obligations of the data importer under Clause 14(e).

- (b) The data importer agrees to document its legal assessment and any challenge to the request for disclosure and, to the extent permissible under the laws of the country of destination, make the documentation available to the data exporter. It shall also make it available to the competent supervisory authority on request.
- (c) The data importer agrees to provide the minimum amount of information permissible when responding to a request for disclosure, based on a reasonable interpretation of the request.

SECTION IV – FINAL PROVISIONS

Clause 16

Non-compliance with the Clauses and termination

- (a) The data importer shall promptly inform the data exporter if it is unable to comply with these Clauses, for whatever reason.
- (b) In the event that the data importer is in breach of these Clauses or unable to comply with these Clauses, the data exporter shall suspend the transfer of personal data to the data importer until compliance is again ensured or the contract is terminated. This is without prejudice to Clause 14(f).
- (c) The data exporter shall be entitled to terminate the contract, insofar as it concerns the processing of personal data under these Clauses, where:
 - (i) the data exporter has suspended the transfer of personal data to the data importer pursuant to paragraph (b) and compliance with these Clauses is not restored within a reasonable time and in any event within one month of suspension;
 - (ii) the data importer is in substantial or persistent breach of these Clauses; or
 - (iii) the data importer fails to comply with a binding decision of a competent court or supervisory authority regarding its obligations under these Clauses.

In these cases, it shall inform the competent supervisory authority of such non-compliance. Where the contract involves more than two Parties, the data exporter may exercise this right to termination only with respect to the relevant Party, unless the Parties have agreed otherwise.

- (d) Personal data that has been transferred prior to the termination of the contract pursuant to paragraph (c) shall at the choice of the data exporter immediately be returned to the data exporter or deleted in its entirety. The same shall apply to any copies of the data. The data importer shall certify the deletion of the

data to the data exporter. Until the data is deleted or returned, the data importer shall continue to ensure compliance with these Clauses. In case of local laws applicable to the data importer that prohibit the return or deletion of the transferred personal data, the data importer warrants that it will continue to ensure compliance with these Clauses and will only process the data to the extent and for as long as required under that local law.

- (e) Either Party may revoke its agreement to be bound by these Clauses where (i) the European Commission adopts a decision pursuant to Article 45(3) of Regulation (EU) 2016/679 that covers the transfer of personal data to which these Clauses apply; or (ii) Regulation (EU) 2016/679 becomes part of the legal framework of the country to which the personal data is transferred. This is without prejudice to other obligations applying to the processing in question under Regulation (EU) 2016/679.

Clause 17

Governing law

These Clauses shall be governed by the law of one of the EU Member States, provided such law allows for third-party beneficiary rights. The Parties agree that this shall be the law of France.

Clause 18

Choice of forum and jurisdiction

- (a) Any dispute arising from these Clauses shall be resolved by the courts of an EU Member State.
- (b) The Parties agree that those shall be the courts of France.
- (c) A data subject may also bring legal proceedings against the data exporter and/or data importer before the courts of the Member State in which he/she has his/her habitual residence.
- (d) The Parties agree to submit themselves to the jurisdiction of such courts.

ANNEX II

TECHNICAL AND ORGANISATIONAL MEASURES INCLUDING TECHNICAL AND ORGANISATIONAL MEASURES TO ENSURE THE SECURITY OF THE DATA

To protect Customer data, HP abides by a robust set of information security controls including policies, practices, procedures, and organizational structures to safeguard the confidentiality, integrity, and availability of its own and its customers' information (including Personal Data as defined in HP's Customer and Data Processing Addenda). The following sets forth an overview of HP's technical/organizational security measures throughout the company.

1. Security Policy

HP maintains globally applicable policies, standards, and procedures intended to protect HP and Customer data. The detail of HP's security policies is confidential to protect the integrity of HP's data and systems. However, summaries of our key policies are included below.

2. Information Security Organization

HP's Information Security program is designed to direct and maintain the organization's information security strategy and controls. This system ensures enterprise-wide compliance with HP's security policies and controls, as well as adherence to the security requirements of its customers. Structured in alignment with industry-standard cybersecurity frameworks, laws, and regulations, the Framework is reviewed annually to adapt to HP's evolving threat landscape.

3. Cybersecurity Risk Management

HP's cybersecurity risk management program is designed to preserve the confidentiality, integrity, and availability of its information assets. The program provides a consistent approach to identifying, assessing, prioritizing, treating, remediating, tracking, and reporting cybersecurity risks. HP defines its Risk Appetite as the acceptable level of loss exposure and Risk Tolerance as the degree of variance from this appetite. Risks are evaluated using a defined methodology, enabling HP to mitigate information security risks to an acceptable level. This program aligns with HP's Enterprise Risk Management process.

4. HR Security

HP Human Resource Security policy ensures information security throughout the employee lifecycle by establishing processes for access to facilities, information systems, and other assets. This includes obtaining written acknowledgments through confidentiality and non-disclosure agreements, as well as conducting background screening procedures. All candidates for employment with HP must complete a background verification check in accordance with relevant laws, regulations, and ethics.

5. Asset Management

HP has a process for identifying technical information assets, categorizing critical assets, and maintaining documented handling procedures for each information classification type, including those containing Personal Data. These procedures cover storage, transmission, communication,

access, logging, retention, destruction, disposal, incident management, and breach notification. HP security policies and standards also mandate the secure disposal of media.

6. Data Security

HP's Data Security program outlines the security practices and technical controls that must be implemented to protect the confidentiality, authenticity, and integrity of data. Legal requirements, value, criticality, and sensitivity to unauthorized disclosure or modification are a few of the factors that determine how information is classified under HP's Data Security policy. In addition to data handling procedures, the policy outlines data encryption, deletion, collection and processing, retention, backup, and data loss prevention.

7. Access Control

HP employs the principle of least privilege for logical access control, providing user access through unique user IDs and passwords. The password policy defines complexity, strength, validity, and password-history controls. Access rights are periodically reviewed and revoked upon personnel departure. Agreed-upon procedures for user account creation and deletion are implemented to grant and revoke access to client systems during engagements.

8. Cryptography

HP has defined a set of robust processes for cryptography to ensure the confidentiality, integrity, and availability of information assets. Approved protocols require encryption for certain assets, including those that contain personal data. Our Cryptography program involves the use of mathematical techniques to secure information and communications, ensuring that only authorized parties can access the data. A critical component of HP's information security program is protecting data from unauthorized access and tampering.

9. Physical and Environmental Security

HP facilities are secured using various physical and electronic access controls, including security guards, electronic access control, and closed-circuit television (CCTV). Facilities are also equipped with necessary infrastructure support, including temperature control and power backups, using UPS and/or diesel generators to support critical services. All HP personnel are registered and required to carry appropriate identification badges.

10. Operations Management

HP has established minimum hardening requirements for technology infrastructure, including workstations, servers, and network equipment. These devices use pre-hardened operating system images, with requirements varying by operating system and implemented controls. Additionally, HP has deployed Network Intrusion Detection/Prevention Systems (NIDS/NIPS) that are monitored and managed 24/7.

11. Communications Security

Communications Security ensures the protection of information within corporate networks. This includes the installation and management of network security components (e.g., firewalls), segregation of networks, as well as web filtering and email handling controls. Additionally, it involves monitoring and managing communication channels to detect and prevent unauthorized access or data breaches.

12. Systems Security

HP's policy mandates a secure development methodology for systems and software throughout their lifecycle. The Software Development Lifecycle covers initiation, development/acquisition, implementation, operations, and disposal. All system components are evaluated for their impact on overall security. HP has established controls for application service transactions, including user credential validation, digital signatures, encryption, secure communication protocols, and storing transaction details within the appropriate network security zone. Regular internal vulnerability scans are also performed.

13. Third Parties and Subcontractors

HP has processes in place to select sub-contractors who comply with comprehensive contractual security requirements. For applicable suppliers handling HP or customer data, or accessing the HP network, HP Cybersecurity conducts a risk assessment to verify an information security program with physical, technical, and administrative safeguards. This assessment is required before the supplier can access HP information.

14. Information Security Incident Management

HP has a comprehensive Cyber Incident Management Process that outlines purpose, scope, roles, responsibilities, management commitment, organizational coordination, implementation procedures, and compliance checking. This process is reviewed and updated annually. The Cyber Incident Response Team, including HP Cybersecurity personnel trained in incident response and crisis management, conducts regular tabletop reviews of the process and any incidents or events.

15. Business Continuity Management

HP's global Continuity of Operations program ensures end-to-end continuity through collaborative, standardized, and documented planning processes. The company periodically exercises its business continuity plans to ensure effectiveness, testing and updating all plans at least yearly. Additionally, all personnel involved in the business continuity plan receive proper training.

16. Compliance

Compliance shapes HP's approach to meeting legal, contractual, and internal expectations for an effective information security program. Regular information security reviews ensure protocols are integrated into each business group's operations. The review process also keeps documents updated to reflect current legal obligations as requirements evolve.

17. Payment Card Industry

The Payment Card Industry (PCI) framework guides HP's approach to achieving PCI Compliance, outlining business responsibilities and security controls aligned with PCI DSS. By installing and maintaining network security controls like firewalls, HP ensures it meets PCI Compliance requirements.

18. HP Product Security

HP Product Security encompasses essential practices to secure HP Products, such as code signing, managing product security vulnerabilities, issuing security bulletins, and reporting product security issues. These measures ensure that HP products remain secure and reliable for users. Product security is of paramount importance at HP, as it helps maintain customer trust and protects against

potential threats.

19. HP Service Security

HP Service Security encompasses essential practices to secure the services provided to HP customers. This policy addresses various areas of service security, including HP infrastructure hosted, third-party hosted, partner hosted, and customer hosted environments. These measures ensure that HP services remain secure and reliable for users. By implementing robust security practices, HP ensures the safety and integrity of its products and services, fostering a secure and trustworthy environment for all users.

For transfers to (sub-) processors, also describe the specific technical and organisational measures to be taken by the (sub-) processor to be able to provide assistance to the controller and, for transfers from a processor to a sub-processor, to the data exporter

Sub-processors only process: name, business email address, business phone number, business address. The purpose of transferring this data is to complete the contract.

For HP all of the above technical and organizational measures are flowed down to the sub-processors through the partner code of conduct and contract terms. Sub-processors are required to commit to following HP's requirements.

Attachment 3

EU STANDARD CONTRACTUAL CLAUSES (DATA PROCESSOR TO DATA PROCESSORS)

SECTION I

Clause 1

Purpose and scope

- (a) The purpose of these standard contractual clauses is to ensure compliance with the requirements of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation) https://eur-lex.europa.eu/legal-content/EN/TXT/HTML/?uri=CELEX:32021D0914&from=EN - ntr1-L_2021199EN.01003701-E0001 for the transfer of personal data to a third country.

 - (ii) the entity/ies in a third country receiving the personal data from the data exporter, directly or indirectly via another entity also Party to these Clauses, as listed in Annex I.A (hereinafter each 'data importer')
- have agreed to these standard contractual clauses (hereinafter: 'Clauses').
- (c) These Clauses apply with respect to the transfer of personal data as specified in Annex I.B.
- (d) The Appendix to these Clauses containing the Annexes referred to therein forms an integral part of these Clauses.

This does not prevent the Parties from including the standard contractual clauses laid down in these Clauses in a wider contract and/or to add other clauses or additional safeguards, provided that they do not contradict, directly or indirectly, these Clauses or prejudice the fundamental rights or freedoms of data subjects.
- (b) These Clauses are without prejudice to obligations to which the data exporter is subject by virtue of Regulation (EU) 2016/679.

Clause 3

- (b) Paragraph (a) is without prejudice to rights of data subjects under Regulation (EU) 2016/679.

Clause 4

Interpretation

- (a) Where these Clauses use terms that are defined in Regulation (EU) 2016/679, those terms shall have the same meaning as in that Regulation.
- (b) These Clauses shall be read and interpreted in the light of the provisions of Regulation (EU) 2016/679.
- (c) These Clauses shall not be interpreted in a way that conflicts with rights and obligations provided for in Regulation (EU) 2016/679.

Clause 5

Hierarchy

In the event of a contradiction between these Clauses and the provisions of related agreements between the Parties, existing at the time these Clauses are agreed or entered into thereafter, these Clauses shall prevail.

Clause 6

Description of the transfer(s)

The details of the transfer(s), and in particular the categories of personal data that are transferred and the purpose(s) for which they are transferred, are specified in Annex I.B.

SECTION II – OBLIGATIONS OF THE PARTIES

Clause 8

Data protection safeguards

The data exporter warrants that it has used reasonable efforts to determine that the data importer is able, through the implementation of appropriate technical and organisational measures, to satisfy its obligations under these Clauses.

8.1 Instructions

- (a) The data exporter has informed the data importer that it acts as processor under the instructions of its controller(s), which the data exporter shall make available to the data importer prior to processing.
- (b) The data importer shall process the personal data only on documented instructions from the controller, as communicated to the data importer by the data exporter, and any additional documented instructions from the data exporter. Such additional instructions shall not conflict with the instructions from the controller. The controller or data exporter may give further documented instructions regarding the data processing throughout the duration of the contract.
- (c) The data importer shall immediately inform the data exporter if it is unable to follow those instructions. Where the data importer is unable to follow the instructions from the controller, the data exporter shall immediately notify the controller.
- (d) The data exporter warrants that it has imposed the same data protection obligations on the data importer as set out in the contract or other legal act under Union or Member State law between the controller and the data exporter.

8.2 Purpose limitation

The data importer shall process the personal data only for the specific purpose(s) of the transfer, as set out in Annex I.B., unless on further instructions from the controller, as communicated to the data importer by the data exporter, or from the data exporter.

8.3 Transparency

On request, the data exporter shall make a copy of these Clauses, including the Appendix as completed by the Parties, available to the data subject free of charge. To the extent necessary to protect business secrets or other confidential information, including personal data, the data exporter may redact part of the text of the Appendix prior to sharing a copy, but shall provide a meaningful summary where the data subject would otherwise not be able to understand its content or exercise his/her rights. On request, the Parties shall provide the data subject with the reasons for the redactions, to the extent possible without revealing the redacted information.

8.4 Accuracy

If the data importer becomes aware that the personal data it has received is inaccurate, or has become outdated, it shall inform the data exporter without undue delay. In this case, the data importer shall cooperate with the data exporter to rectify or erase the data.

8.5 Duration of processing and erasure or return of data

Processing by the data importer shall only take place for the duration specified in Annex I.B. After the end of the provision of the processing services, the data importer shall, at the choice of the data exporter, delete all personal data processed on behalf of the controller and certify to the data exporter that it has done so, or return to the data exporter all personal data processed on its behalf and delete existing copies. Until the data is deleted or returned, the data importer shall continue to ensure compliance with these Clauses. In case of local laws applicable to the data importer that prohibit return or deletion of the personal data, the data importer warrants that it will continue to ensure compliance with these Clauses and will only process it to the extent and for as long as required under that local law. This is without prejudice to Clause 14, in particular the requirement for the data importer under Clause 14(e) to notify the data exporter throughout the duration of the contract if it has reason to believe that it is or has become subject to laws or practices not in line with the requirements under Clause 14(a).

8.6 Security of processing

- (a) The data importer and, during transmission, also the data exporter shall implement appropriate technical and organisational measures to ensure the security of the data, including protection against a breach of security leading to accidental or unlawful destruction, loss, alteration, unauthorised disclosure or access to that data (hereinafter 'personal data breach'). In assessing the appropriate level of security, they shall take due account of the state of the art, the costs of implementation, the nature, scope, context and purpose(s) of processing and the risks involved in the processing for the data subject. The Parties shall in particular consider having recourse to encryption or pseudonymisation, including during transmission, where the purpose of processing can be fulfilled in that manner. In case of pseudonymisation, the additional information for attributing the personal data to a specific data subject shall, where possible, remain under the exclusive control of the data exporter or the controller. In complying with its obligations under this paragraph, the data importer shall at least implement the technical and organisational measures specified in Annex II. The data importer shall carry out regular checks to ensure that these measures continue to provide an appropriate level of security.
- (b) The data importer shall grant access to the data to members of its personnel only to the extent strictly necessary for the implementation, management and monitoring of the contract. It shall ensure that persons authorised to process the personal data have committed themselves to confidentiality or are under an appropriate statutory obligation of confidentiality.
- (c) In the event of a personal data breach concerning personal data processed by the data importer under these Clauses, the data importer shall take appropriate measures to address the breach, including measures to mitigate its adverse effects. The data importer shall also notify, without undue delay, the data exporter and, where appropriate and feasible, the controller after having become aware of the breach. Such notification shall contain the details of a contact point where more information can be obtained, a description of the

nature of the breach (including, where possible, categories and approximate number of data subjects and personal data records concerned), its likely consequences and the measures taken or proposed to address the data breach, including measures to mitigate its possible adverse effects. Where, and in so far as, it is not possible to provide all information at the same time, the initial notification shall contain the information then available and further information shall, as it becomes available, subsequently be provided without undue delay.

- (d) The data importer shall cooperate with and assist the data exporter to enable the data exporter to comply with its obligations under Regulation (EU) 2016/679, in particular to notify its controller so that the latter may in turn notify the competent supervisory authority and the affected data subjects, taking into account the nature of processing and the information available to the data importer.

8.7 Sensitive data

Where the transfer involves personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, genetic data, or biometric data for the purpose of uniquely identifying a natural person, data concerning health or a person's sex life or sexual orientation, or data relating to criminal convictions and offences (hereinafter 'sensitive data'), the data importer shall apply the specific restrictions and/or additional safeguards set out in Annex I.B.

8.8 Onward transfers

The data importer shall only disclose the personal data to a third party on documented instructions from the controller, as communicated to the data importer by the data exporter. In addition, the data may only be disclosed to a third party located outside the European Union <https://eur-lex.europa.eu/legal-content/EN/TXT/HTML/?uri=CELEX:32021D0914&from=EN> - [ntr6-L_2021199EN.01003701-E0006](https://eur-lex.europa.eu/legal-content/EN/TXT/HTML/?uri=CELEX:32021L_2021199EN.01003701-E0006) (in the same country as the data importer or in another third country, hereinafter 'onward transfer') if the third party is or agrees to be bound by these Clauses, under the appropriate Module, or if:

- (i) the onward transfer is to a country benefitting from an adequacy decision pursuant to Article 45 of Regulation (EU) 2016/679 that covers the onward transfer;
- (ii) the third party otherwise ensures appropriate safeguards pursuant to Articles 46 or 47 of Regulation (EU) 2016/679;
- (iii) the onward transfer is necessary for the establishment, exercise or defence of legal claims in the context of specific administrative, regulatory or judicial proceedings; or
- (iv) the onward transfer is necessary in order to protect the vital interests of the data subject or of another natural person.

Any onward transfer is subject to compliance by the data importer with all the other safeguards under these Clauses, in particular purpose limitation.

8.9 Documentation and compliance

- (a) The data importer shall promptly and adequately deal with enquiries from the data exporter or the controller that relate to the processing under these Clauses.
- (b) The Parties shall be able to demonstrate compliance with these Clauses. In particular, the data importer shall keep appropriate documentation on the processing activities carried out on behalf of the controller.
- (c) The data importer shall make all information necessary to demonstrate compliance with the obligations set out in these Clauses available to the data exporter, which shall provide it to the controller.
- (d) The data importer shall allow for and contribute to audits by the data exporter of the processing activities covered by these Clauses, at reasonable intervals or if there are indications of non-compliance. The same shall apply where the data exporter requests an audit on instructions of the controller. In deciding on an audit, the data exporter may take into account relevant certifications held by the data importer.
- (e) Where the audit is carried out on the instructions of the controller, the data exporter shall make the results available to the controller.
- (f) The data exporter may choose to conduct the audit by itself or mandate an independent auditor. Audits may include inspections at the premises or physical facilities of the data importer and shall, where appropriate, be carried out with reasonable notice.
- (g) The Parties shall make the information referred to in paragraphs (b) and (c), including the results of any audits, available to the competent supervisory authority on request.

Clause 9

Use of sub-processors

- (a) **GENERAL WRITTEN AUTHORISATION** The data importer has the controller's general authorisation for the engagement of sub-processor(s) from an agreed list. The data importer shall specifically inform the controller in writing of any intended changes to that list through the addition or replacement of sub-processors at least 10 days in advance, thereby giving the controller sufficient time to be able to object to such changes prior to the engagement of the sub-processor(s). The data importer shall provide the controller with the information necessary to enable the controller to exercise its right to object. The data importer shall inform the data exporter of the engagement of the sub-processor(s).
- (b) Where the data importer engages a sub-processor to carry out specific processing activities (on behalf of the controller), it shall do so by way of a written contract that provides for, in substance, the same data protection obligations as those binding the data importer under these Clauses, including in terms of third-party beneficiary rights for data subjects. The Parties agree that, by complying with this Clause, the data importer fulfils its obligations under Clause 8.8. The data importer shall ensure that the sub-processor complies with the obligations to which the data importer is subject pursuant to these Clauses.
- (c) The data importer shall provide, at the data exporter's or controller's request, a copy of such a sub-processor agreement and any subsequent amendments. To the extent necessary to protect business

secrets or other confidential information, including personal data, the data importer may redact the text of the agreement prior to sharing a copy.

- (d) The data importer shall remain fully responsible to the data exporter for the performance of the sub-processor's obligations under its contract with the data importer. The data importer shall notify the data exporter of any failure by the sub-processor to fulfil its obligations under that contract.
- (e) The data importer shall agree a third-party beneficiary clause with the sub-processor whereby – in the event the data importer has factually disappeared, ceased to exist in law or has become insolvent – the data exporter shall have the right to terminate the sub-processor contract and to instruct the sub-processor to erase or return the personal data.

Clause 10

Data subject rights

- (a) The data importer shall promptly notify the data exporter and, where appropriate, the controller of any request it has received from a data subject, without responding to that request unless it has been authorised to do so by the controller.
- (b) The data importer shall assist, where appropriate in cooperation with the data exporter, the controller in fulfilling its obligations to respond to data subjects' requests for the exercise of their rights under Regulation (EU) 2016/679 or Regulation (EU) 2018/1725, as applicable. In this regard, the Parties shall set out in Annex II the appropriate technical and organisational measures, taking into account the nature of the processing, by which the assistance shall be provided, as well as the scope and the extent of the assistance required.
- (c) In fulfilling its obligations under paragraphs (a) and (b), the data importer shall comply with the instructions from the controller, as communicated by the data exporter.

Clause 11

Redress

- (a) The data importer shall inform data subjects in a transparent and easily accessible format, through individual notice or on its website, of a contact point authorised to handle complaints. It shall deal promptly with any complaints it receives from a data subject.
- (b) In case of a dispute between a data subject and one of the Parties as regards compliance with these Clauses, that Party shall use its best efforts to resolve the issue amicably in a timely fashion. The Parties shall keep each other informed about such disputes and, where appropriate, cooperate in resolving them.
- (c) Where the data subject invokes a third-party beneficiary right pursuant to Clause 3, the data importer shall accept the decision of the data subject to:

- (i) lodge a complaint with the supervisory authority in the Member State of his/her habitual residence or place of work, or the competent supervisory authority pursuant to Clause 13;
- (ii) refer the dispute to the competent courts within the meaning of Clause 18.
- (d) The Parties accept that the data subject may be represented by a not-for-profit body, organisation or association under the conditions set out in Article 80(1) of Regulation (EU) 2016/679.
- (e) The data importer shall abide by a decision that is binding under the applicable EU or Member State law.
- (f) The data importer agrees that the choice made by the data subject will not prejudice his/her substantive and procedural rights to seek remedies in accordance with applicable laws.

Clause 12

Liability

- (a) Each Party shall be liable to the other Party/ies for any damages it causes the other Party/ies by any breach of these Clauses.
- (b) The data importer shall be liable to the data subject, and the data subject shall be entitled to receive compensation, for any material or non-material damages the data importer or its sub-processor causes the data subject by breaching the third-party beneficiary rights under these Clauses.
- (c) Notwithstanding paragraph (b), the data exporter shall be liable to the data subject, and the data subject shall be entitled to receive compensation, for any material or non-material damages the data exporter or the data importer (or its sub-processor) causes the data subject by breaching the third-party beneficiary rights under these Clauses. This is without prejudice to the liability of the data exporter and, where the data exporter is a processor acting on behalf of a controller, to the liability of the controller under Regulation (EU) 2016/679 or Regulation (EU) 2018/1725, as applicable.
- (d) The Parties agree that if the data exporter is held liable under paragraph (c) for damages caused by the data importer (or its sub-processor), it shall be entitled to claim back from the data importer that part of the compensation corresponding to the data importer's responsibility for the damage.
- (e) Where more than one Party is responsible for any damage caused to the data subject as a result of a breach of these Clauses, all responsible Parties shall be jointly and severally liable and the data subject is entitled to bring an action in court against any of these Parties.
- (f) The Parties agree that if one Party is held liable under paragraph (e), it shall be entitled to claim back from the other Party/ies that part of the compensation corresponding to its/their responsibility for the damage.
- (g) The data importer may not invoke the conduct of a sub-processor to avoid its own liability.

Clause 13

Supervision

- (a) Where the data exporter is established in an EU Member State: The supervisory authority with responsibility for ensuring compliance by the data exporter with Regulation (EU) 2016/679 as regards the data transfer, as indicated in Annex I.C, shall act as competent supervisory authority.

Where the data exporter is not established in an EU Member State, but falls within the territorial scope of application of Regulation (EU) 2016/679 in accordance with its Article 3(2) and has appointed a representative pursuant to Article 27(1) of Regulation (EU) 2016/679: The supervisory authority of the Member State in which the representative within the meaning of Article 27(1) of Regulation (EU) 2016/679 is established, as indicated in Annex I.C, shall act as competent supervisory authority.

Where the data exporter is not established in an EU Member State, but falls within the territorial scope of application of Regulation (EU) 2016/679 in accordance with its Article 3(2) without however having to appoint a representative pursuant to Article 27(2) of Regulation (EU) 2016/679: The supervisory authority of one of the Member States in which the data subjects whose personal data is transferred under these Clauses in relation to the offering of goods or services to them, or whose behaviour is monitored, are located, as indicated in Annex I.C, shall act as competent supervisory authority.

- (b) The data importer agrees to submit itself to the jurisdiction of and cooperate with the competent supervisory authority in any procedures aimed at ensuring compliance with these Clauses. In particular, the data importer agrees to respond to enquiries, submit to audits and comply with the measures adopted by the supervisory authority, including remedial and compensatory measures. It shall provide the supervisory authority with written confirmation that the necessary actions have been taken.

SECTION III – LOCAL LAWS AND OBLIGATIONS IN CASE OF ACCESS BY PUBLIC AUTHORITIES

Clause 14

Local laws and practices affecting compliance with the Clauses

- (a) The Parties warrant that they have no reason to believe that the laws and practices in the third country of destination applicable to the processing of the personal data by the data importer, including any requirements to disclose personal data or measures authorising access by public authorities, prevent the data importer from fulfilling its obligations under these Clauses. This is based on the understanding that laws and practices that respect the essence of the fundamental rights and freedoms and do not exceed what is necessary and proportionate in a democratic society to safeguard one of the objectives listed in Article 23(1) of Regulation (EU) 2016/679, are not in contradiction with these Clauses.
- (b) The Parties declare that in providing the warranty in paragraph (a), they have taken due account in particular of the following elements:
- (i) the specific circumstances of the transfer, including the length of the processing chain, the number of actors involved and the transmission channels used; intended onward transfers; the type of recipient;

the purpose of processing; the categories and format of the transferred personal data; the economic sector in which the transfer occurs; the storage location of the data transferred;

- (ii) the laws and practices of the third country of destination – including those requiring the disclosure of data to public authorities or authorising access by such authorities – relevant in light of the specific circumstances of the transfer, and the applicable limitations and safeguards;
 - (iii) any relevant contractual, technical or organisational safeguards put in place to supplement the safeguards under these Clauses, including measures applied during transmission and to the processing of the personal data in the country of destination.
- (c) The data importer warrants that, in carrying out the assessment under paragraph (b), it has made its best efforts to provide the data exporter with relevant information and agrees that it will continue to cooperate with the data exporter in ensuring compliance with these Clauses.
 - (d) The Parties agree to document the assessment under paragraph (b) and make it available to the competent supervisory authority on request.
 - (e) The data importer agrees to notify the data exporter promptly if, after having agreed to these Clauses and for the duration of the contract, it has reason to believe that it is or has become subject to laws or practices not in line with the requirements under paragraph (a), including following a change in the laws of the third country or a measure (such as a disclosure request) indicating an application of such laws in practice that is not in line with the requirements in paragraph (a). The data exporter shall forward the notification to the controller.
 - (f) Following a notification pursuant to paragraph (e), or if the data exporter otherwise has reason to believe that the data importer can no longer fulfil its obligations under these Clauses, the data exporter shall promptly identify appropriate measures (e.g. technical or organisational measures to ensure security and confidentiality) to be adopted by the data exporter and/or data importer to address the situation, if appropriate in consultation with the controller. The data exporter shall suspend the data transfer if it considers that no appropriate safeguards for such transfer can be ensured, or if instructed by the controller or the competent supervisory authority to do so. In this case, the data exporter shall be entitled to terminate the contract, insofar as it concerns the processing of personal data under these Clauses. If the contract involves more than two Parties, the data exporter may exercise this right to termination only with respect to the relevant Party, unless the Parties have agreed otherwise. Where the contract is terminated pursuant to this Clause, Clause 16(d) and (e) shall apply.

Clause 15

Obligations of the data importer in case of access by public authorities

15.1 Notification

- (a) The data importer agrees to notify the data exporter and, where possible, the data subject promptly (if necessary with the help of the data exporter) if it:

- (i) receives a legally binding request from a public authority, including judicial authorities, under the laws of the country of destination for the disclosure of personal data transferred pursuant to these Clauses; such notification shall include information about the personal data requested, the requesting authority, the legal basis for the request and the response provided; or
- (ii) becomes aware of any direct access by public authorities to personal data transferred pursuant to these Clauses in accordance with the laws of the country of destination; such notification shall include all information available to the importer.

The data exporter shall forward the notification to the controller.

- (b) If the data importer is prohibited from notifying the data exporter and/or the data subject under the laws of the country of destination, the data importer agrees to use its best efforts to obtain a waiver of the prohibition, with a view to communicating as much information as possible, as soon as possible. The data importer agrees to document its best efforts in order to be able to demonstrate them on request of the data exporter.
- (c) Where permissible under the laws of the country of destination, the data importer agrees to provide the data exporter, at regular intervals for the duration of the contract, with as much relevant information as possible on the requests received (in particular, number of requests, type of data requested, requesting authority/ies, whether requests have been challenged and the outcome of such challenges, etc.). The data exporter shall forward the information to the controller.
- (d) The data importer agrees to preserve the information pursuant to paragraphs (a) to (c) for the duration of the contract and make it available to the competent supervisory authority on request.
- (e) Paragraphs (a) to (c) are without prejudice to the obligation of the data importer pursuant to Clause 14(e) and Clause 16 to inform the data exporter promptly where it is unable to comply with these Clauses.

15.2 Review of legality and data minimisation

- (a) The data importer agrees to review the legality of the request for disclosure, in particular whether it remains within the powers granted to the requesting public authority, and to challenge the request if, after careful assessment, it concludes that there are reasonable grounds to consider that the request is unlawful under the laws of the country of destination, applicable obligations under international law and principles of international comity. The data importer shall, under the same conditions, pursue possibilities of appeal. When challenging a request, the data importer shall seek interim measures with a view to suspending the effects of the request until the competent judicial authority has decided on its merits. It shall not disclose the personal data requested until required to do so under the applicable procedural rules. These requirements are without prejudice to the obligations of the data importer under Clause 14(e).
- (b) The data importer agrees to document its legal assessment and any challenge to the request for disclosure and, to the extent permissible under the laws of the country of destination, make the

documentation available to the data exporter. It shall also make it available to the competent supervisory authority on request. The data exporter shall make the assessment available to the controller.

- (c) The data importer agrees to provide the minimum amount of information permissible when responding to a request for disclosure, based on a reasonable interpretation of the request.

SECTION IV – FINAL PROVISIONS

Clause 16

Non-compliance with the Clauses and termination

- (a) The data importer shall promptly inform the data exporter if it is unable to comply with these Clauses, for whatever reason.
- (b) In the event that the data importer is in breach of these Clauses or unable to comply with these Clauses, the data exporter shall suspend the transfer of personal data to the data importer until compliance is again ensured or the contract is terminated. This is without prejudice to Clause 14(f).
- (c) The data exporter shall be entitled to terminate the contract, insofar as it concerns the processing of personal data under these Clauses, where:
 - (i) the data exporter has suspended the transfer of personal data to the data importer pursuant to paragraph (b) and compliance with these Clauses is not restored within a reasonable time and in any event within one month of suspension;
 - (ii) the data importer is in substantial or persistent breach of these Clauses; or
 - (iii) the data importer fails to comply with a binding decision of a competent court or supervisory authority regarding its obligations under these Clauses.

In these cases, it shall inform the competent supervisory authority and the controller of such non-compliance. Where the contract involves more than two Parties, the data exporter may exercise this right to termination only with respect to the relevant Party, unless the Parties have agreed otherwise.

- (d) Personal data that has been transferred prior to the termination of the contract pursuant to paragraph (c) shall at the choice of the data exporter immediately be returned to the data exporter or deleted in its entirety. The same shall apply to any copies of the data. The data importer shall certify the deletion of the data to the data exporter. Until the data is deleted or returned, the data importer shall continue to ensure compliance with these Clauses. In case of local laws applicable to the data importer that prohibit the return or deletion of the transferred personal data, the data importer warrants that it will continue to ensure compliance with these Clauses and will only process the data to the extent and for as long as required under that local law.
- (e) Either Party may revoke its agreement to be bound by these Clauses where (i) the European Commission adopts a decision pursuant to Article 45(3) of Regulation (EU) 2016/679 that covers the transfer of personal data to which these Clauses apply; or (ii) Regulation (EU) 2016/679 becomes part of the legal

framework of the country to which the personal data is transferred. This is without prejudice to other obligations applying to the processing in question under Regulation (EU) 2016/679.

Clause 17

Governing law

These Clauses shall be governed by the law of one of the EU Member States, provided such law allows for third-party beneficiary rights. The Parties agree that this shall be the law of France.

Clause 18

Choice of forum and jurisdiction

- (a) Any dispute arising from these Clauses shall be resolved by the courts of an EU Member State.
- (b) The Parties agree that those shall be the courts of France.
- (c) A data subject may also bring legal proceedings against the data exporter and/or data importer before the courts of the Member State in which he/she has his/her habitual residence.
- (d) The Parties agree to submit themselves to the jurisdiction of such courts.

ANNEX II

TECHNICAL AND ORGANISATIONAL MEASURES INCLUDING TECHNICAL AND ORGANISATIONAL MEASURES TO ENSURE THE SECURITY OF THE DATA

To protect Customer data, HP abides by a robust set of information security controls including policies, practices, procedures, and organizational structures to safeguard the confidentiality, integrity, and availability of its own and its customers' information (including Personal Data as defined in HP's Customer and Data Processing Addenda). The following sets forth an overview of HP's technical/organizational security measures throughout the company.

1. Security Policy

HP maintains globally applicable policies, standards, and procedures intended to protect HP and Customer data. The detail of HP's security policies is confidential to protect the integrity of HP's data and systems. However, summaries of our key policies are included below.

2. Information Security Organization

HP's Information Security program is designed to direct and maintain the organization's information security strategy and controls. This system ensures enterprise-wide compliance with HP's security policies and controls, as well as adherence to the security requirements of its customers. Structured in alignment with industry-standard cybersecurity frameworks, laws, and regulations, the Framework is reviewed annually to adapt to HP's evolving threat landscape.

3. Cybersecurity Risk Management

HP's cybersecurity risk management program is designed to preserve the confidentiality, integrity, and availability of its information assets. The program provides a consistent approach to identifying, assessing, prioritizing, treating, remediating, tracking, and reporting cybersecurity risks. HP defines its Risk Appetite as the acceptable level of loss exposure and Risk Tolerance as the degree of variance from this appetite. Risks are evaluated using a defined methodology, enabling HP to mitigate information security risks to an acceptable level. This program aligns with HP's Enterprise Risk Management process.

4. HR Security

HP Human Resource Security policy ensures information security throughout the employee lifecycle by establishing processes for access to facilities, information systems, and other assets. This includes obtaining written acknowledgments through confidentiality and non-disclosure agreements, as well as conducting background screening procedures. All candidates for employment with HP must complete a background verification check in accordance with relevant laws, regulations, and ethics.

5. Asset Management

HP has a process for identifying technical information assets, categorizing critical assets, and maintaining documented handling procedures for each information classification type, including those containing Personal Data. These procedures cover storage, transmission, communication, access, logging, retention, destruction, disposal, incident management, and breach notification. HP

security policies and standards also mandate the secure disposal of media.

6. Data Security

HP's Data Security program outlines the security practices and technical controls that must be implemented to protect the confidentiality, authenticity, and integrity of data. Legal requirements, value, criticality, and sensitivity to unauthorized disclosure or modification are a few of the factors that determine how information is classified under HP's Data Security policy. In addition to data handling procedures, the policy outlines data encryption, deletion, collection and processing, retention, backup, and data loss prevention.

7. Access Control

HP employs the principle of least privilege for logical access control, providing user access through unique user IDs and passwords. The password policy defines complexity, strength, validity, and password-history controls. Access rights are periodically reviewed and revoked upon personnel departure. Agreed-upon procedures for user account creation and deletion are implemented to grant and revoke access to client systems during engagements.

8. Cryptography

HP has defined a set of robust processes for cryptography to ensure the confidentiality, integrity, and availability of information assets. Approved protocols require encryption for certain assets, including those that contain personal data. Our Cryptography program involves the use of mathematical techniques to secure information and communications, ensuring that only authorized parties can access the data. A critical component of HP's information security program is protecting data from unauthorized access and tampering.

9. Physical and Environmental Security

HP facilities are secured using various physical and electronic access controls, including security guards, electronic access control, and closed-circuit television (CCTV). Facilities are also equipped with necessary infrastructure support, including temperature control and power backups, using UPS and/or diesel generators to support critical services. All HP personnel are registered and required to carry appropriate identification badges.

10. Operations Management

HP has established minimum hardening requirements for technology infrastructure, including workstations, servers, and network equipment. These devices use pre-hardened operating system images, with requirements varying by operating system and implemented controls. Additionally, HP has deployed Network Intrusion Detection/Prevention Systems (NIDS/NIPS) that are monitored and managed 24/7.

11. Communications Security

Communications Security ensures the protection of information within corporate networks. This includes the installation and management of network security components (e.g., firewalls), segregation of networks, as well as web filtering and email handling controls. Additionally, it involves monitoring and managing communication channels to detect and prevent unauthorized access or data breaches.

12. Systems Security

HP's policy mandates a secure development methodology for systems and software throughout their lifecycle. The Software Development Lifecycle covers initiation, development/acquisition, implementation, operations, and disposal. All system components are evaluated for their impact on overall security. HP has established controls for application service transactions, including user credential validation, digital signatures, encryption, secure communication protocols, and storing transaction details within the appropriate network security zone. Regular internal vulnerability scans are also performed.

13. Third Parties and Subcontractors

HP has processes in place to select sub-contractors who comply with comprehensive contractual security requirements. For applicable suppliers handling HP or customer data, or accessing the HP network, HP Cybersecurity conducts a risk assessment to verify an information security program with physical, technical, and administrative safeguards. This assessment is required before the supplier can access HP information.

14. Information Security Incident Management

HP has a comprehensive Cyber Incident Management Process that outlines purpose, scope, roles, responsibilities, management commitment, organizational coordination, implementation procedures, and compliance checking. This process is reviewed and updated annually. The Cyber Incident Response Team, including HP Cybersecurity personnel trained in incident response and crisis management, conducts regular tabletop reviews of the process and any incidents or events.

15. Business Continuity Management

Table 4: Security Requirements

Security of Transmission	HP has defined controls for the protection of application service transactions. These controls include: validating and verifying user credentials, mandating digital signatures and encryption, implementing secure communication protocols, storing online transaction details on servers within the appropriate network security zone.
Security of Storage	HP's cybersecurity department/organization and HP's legal department maintain a set of documented handling procedures for each information classification type and work along with department in charge of Data Privacy for any pertinent matters. Handling procedures account for: storage, transmission, communication, access, logging, retention, destruction, disposal, incident management, and breach notification.

	HP Information Technology have a process in place for identifying technical information assets. HP identifies all assets under its responsibility, categorizing the critical assets. A record of information assets and systems that are both HP-owned and externally managed by service providers is maintained. Documented processes for server decommissioning, orphaned and legacy media are also implemented to ensure proper management and disposition of non-removable media.
Security of Processing	By policy, development of systems and supporting software within HP follow a secure development methodology to ensure security throughout the system/software lifecycle. The Software Development Lifecycle defines initiation, development/acquisition, implementation, operations, and disposal requirements. All system components, which include modules, libraries, services, and discrete components, are evaluated to determine their impact on the overall system security state. HP implements logging mechanisms for system applications and devices. HP has developed robust procedures for the installation, configuration, upgrade, testing, and security patching of operational software, including but not limited to email, office productivity suites, and Internet browsers. Internal vulnerability scans are performed both on a quarterly basis and after any significant change.
Organisational security measures	To protect its own as well as Customer Personal Data, HP has defined a minimum set of hardening requirements for technology infrastructure which includes workstations, servers and network equipment. Workstation / servers images contain pre-hardened operating systems. Hardening requirements vary depending on the type of operating system and applicable controls implemented. Systems with external connections will be protected by hardening and firewalls. Externally facing systems will be placed in a Demilitarized Zone (DMZ) or other similar configuration to protect internal HP systems. Critical network zones are logically isolated. Remote access to devices on the HP internal network, with the exception of the email system, requires the use of HP standard VPN solution. Network Intrusion Detection / Prevention Systems (NIDS/ NIPS) are placed in strategic locations within the network and are monitored and managed 24*7. All devices that have logging capabilities, such as operating systems, databases, applications, firewalls, routers and

	switches are required to be configured as per HP's logging and auditing standard. HP security policies and standards mandate secure disposal of media.
Technical security minimum requirements	Developers are required to follow the coding standards and testing guidelines defined for the system to comply with application security requirements. Source code is required to be secured in a manner that prevents unauthorized access. Preliminary testing is performed and non-production patch testing is scheduled. Post feedback from the non-production testing, implementation on production environment is scheduled and implemented.
Updates to the Security Requirements	☒ The Security Requirements will update automatically if the information is updated in the Linked Agreement referred to. ☐ The Security Requirements will NOT update automatically if the information is updated in the Linked Agreement referred to. The Parties must agree a change under Section 5.3.

This includes obtaining written acknowledgments through confidentiality and non-disclosure agreements, as well as conducting background screening procedures. All candidates for employment with HP must complete a background verification check in accordance with relevant laws, regulations, and ethics.

5. Asset Management

HP has a process for identifying technical information assets, categorizing critical assets, and maintaining documented handling procedures for each information classification type, including those containing Personal Data. These procedures cover storage, transmission, communication, access, logging, retention, destruction, disposal, incident management, and breach notification. HP security policies and standards also mandate the secure disposal of media.

6. Data Security

HP's Data Security program outlines the security practices and technical controls that must be implemented to protect the confidentiality, authenticity, and integrity of data. Legal requirements, value, criticality, and sensitivity to unauthorized disclosure or modification are a few of the factors that determine how information is classified under HP's Data Security policy. In addition to data handling procedures, the policy outlines data encryption, deletion, collection and processing, retention, backup, and data loss prevention.

7. Access Control

HP employs the principle of least privilege for logical access control, providing user access through unique user IDs and passwords. The password policy defines complexity, strength, validity, and password-history controls. Access rights are periodically reviewed and revoked upon personnel

departure. Agreed-upon procedures for user account creation and deletion are implemented to grant and revoke access to client systems during engagements.

8. Cryptography

HP has defined a set of robust processes for cryptography to ensure the confidentiality, integrity, and availability of information assets. Approved protocols require encryption for certain assets, including those that contain personal data. Our Cryptography program involves the use of mathematical techniques to secure information and communications, ensuring that only authorized parties can access the data. A critical component of HP's information security program is protecting data from unauthorized access and tampering.

9. Physical and Environmental Security

HP facilities are secured using various physical and electronic access controls, including security guards, electronic access control, and closed-circuit television (CCTV). Facilities are also equipped with necessary infrastructure support, including temperature control and power backups, using UPS and/or diesel generators to support critical services. All HP personnel are registered and required to carry appropriate identification badges.

10. Operations Management

HP has established minimum hardening requirements for technology infrastructure, including workstations, servers, and network equipment. These devices use pre-hardened operating system images, with requirements varying by operating system and implemented controls. Additionally, HP has deployed Network Intrusion Detection/Prevention Systems (NIDS/NIPS) that are monitored and managed 24/7.

11. Communications Security

Communications Security ensures the protection of information within corporate networks. This includes the installation and management of network security components (e.g., firewalls), segregation of networks, as well as web filtering and email handling controls. Additionally, it involves monitoring and managing communication channels to detect and prevent unauthorized access or data breaches.

12. Systems Security

HP's policy mandates a secure development methodology for systems and software throughout their lifecycle. The Software Development Lifecycle covers initiation, development/acquisition, implementation, operations, and disposal. All system components are evaluated for their impact on overall security. HP has established controls for application service transactions, including user credential validation, digital signatures, encryption, secure communication protocols, and storing transaction details within the appropriate network security zone. Regular internal vulnerability scans are also performed.

13. Third Parties and Subcontractors

HP has processes in place to select sub-contractors who comply with comprehensive contractual security requirements. For applicable suppliers handling HP or customer data, or accessing the HP network, HP Cybersecurity conducts a risk assessment to verify an information security program with physical, technical, and administrative safeguards. This assessment is required before the supplier can access HP information.

14. Information Security Incident Management

HP has a comprehensive Cyber Incident Management Process that outlines purpose, scope, roles, responsibilities, management commitment, organizational coordination, implementation procedures, and compliance checking. This process is reviewed and updated annually. The Cyber

Incident Response Team, including HP Cybersecurity personnel trained in incident response and crisis management, conducts regular tabletop reviews of the process and any incidents or events.

15. Business Continuity Management

HP's global Continuity of Operations program ensures end-to-end continuity through collaborative, standardized, and documented planning processes. The company periodically exercises its business continuity plans to ensure effectiveness, testing and updating all plans at least yearly. Additionally, all personnel involved in the business continuity plan receive proper training.

16. Compliance

Compliance shapes HP's approach to meeting legal, contractual, and internal expectations for an effective information security program. Regular information security reviews ensure protocols are integrated into each business group's operations. The review process also keeps documents updated to reflect current legal obligations as requirements evolve.

17. Payment Card Industry

The Payment Card Industry (PCI) framework guides HP's approach to achieving PCI Compliance, outlining business responsibilities and security controls aligned with PCI DSS. By installing and maintaining network security controls like firewalls, HP ensures it meets PCI Compliance requirements.

18. HP Product Security

HP Product Security encompasses essential practices to secure HP Products, such as code signing, managing product security vulnerabilities, issuing security bulletins, and reporting product security issues. These measures ensure that HP products remain secure and reliable for users. Product security is of paramount importance at HP, as it helps maintain customer trust and protects against potential threats.

19. HP Service Security

HP Service Security encompasses essential practices to secure the services provided to HP customers. This policy addresses various areas of service security, including HP infrastructure hosted, third-party hosted, partner hosted, and customer hosted environments. These measures ensure that HP services remain secure and reliable for users. By implementing robust security practices, HP ensures the safety and integrity of its products and services, fostering a secure and trustworthy environment for all users.
