

HP Automotive Credit Application Accelerator

Overview

The HP Automotive Credit Application Accelerator is a complete document workflow solution designed to accelerate the credit approval process of automotive financial operations. The solution provides integrated access to digitized documents routed through a configurable workflow and incorporated into existing business applications. The solution allows automotive manufacturers and dealers to benefit from consolidated copying, scanning and printing functions in a secure networked environment.

HP Automotive Credit Application Accelerator drastically reduces and simplifies time and costs involved with credit requests and approvals by automating core credit application processes set to improve efficiency and potentially speed up revenue streams while reducing operation costs. The solution improves document management across the business operation, enhancing document traceability and storage to assist in regulatory compliance. Additionally, it simplifies the credit request submission process, immediately notifying the user when an action is required, allowing for faster credit resolution times and improvement of customer service.
