

HP Insurance Claims Transformation

Overview

HP Insurance Claims Processing is a comprehensive solution designed to accelerate and streamline the flow of documents through the insurance claims process. The solution helps insurance carriers reduce the cost of claims processing, reduce cycle times and improve claims handler productivity. It also allows for capturing, managing, creating and delivering critical insurance claims documents efficiently and more securely. The HP Insurance Claims Transformation solution enables insurance carriers to make informed claims decisions and also assists with meeting requirements for regulatory compliance and litigation support.

Key features and benefits

- Optimize insurance claims process with a comprehensive document solution that optimizes the creation, capture, delivery and management of claims documents
- Reduce claims cycle times by leveraging the business technology optimization features
- Quickly and accurately process claims with fast, automated and flexible document processing
- Improve customer service; enhance claims decision making, litigation support and eDiscovery with powerful records management
- Maximize claims handler productivity with digital workflows and immediate access to critical documents
- Improve consistency of claims handling with workflow controls allowing for quick, electronic access to all relevant documents
- Provide claims handlers and administrators with universal and immediate access to key information from remote locations through an adaptive infrastructure
- Eliminate the costs and latency of manual sorting and processing of paper claims documents

Availability

HP Insurance Claims Transformation solution is expected to be available worldwide in September 2009.
